1. Describe a new development in your country or the area where you live (like shopping centre, park etcetera)

- What and where the development is
 - What it was like before
 - How long it took to complete it
 - How people feel about it
 - And explain how it has improved the area you live in
-

- I think developments in infrastructure are very essential for the progress of a nation.
- Developments could be in sectors like healthcare, education, housing etcetera
- Today, I would like to talk about a recent development in our country which is related to the transportation sector.
- Last month our honourable Prime Minister Shri Narendra Modi inaugurated the first automatic/unmanned/driverless metro train in the national capital Delhi.
- The launch of this train was covered by all the new channels and leading newspapers.
- That is how I came to know about it.
- This metro train connects several stations between New Delhi and Noida a city adjoining the national capital
- The launch of this train has benefitted millions of people who otherwise travel by bus or other transport means like their own cars and motorbikes
- It has reduced their travel time significantly and it has also become more convenient for them to travel from one place to another.
- The coaches of the train are imported from Germany and are made of very high quality steel.
- I believe the government should introduce more such trains in the major cities of our country because it provides a lot of benefits to the people and the environment.
- Moreover, it decreases the number of traffic jams in the city and the pollution caused when people use their own private vehicles
- This train has no driver; it is remotely controlled by a computer thus avoiding any human errors that can cause accidents.
- When I first told my friends about this train, all of them were surprised/amazed/astonished to hear that a train can run without a driver as well.
- This train has 8 coaches and capacity to carry 1000 people at one time
- The coaches are very modern and have free wifi and phone charging facility as well.
- The train also has seats reserved specially for the elderly and women
- But when I showed them the news they were very excited about it.
- We have also made a plan to travel by this train, next month.

Part 3 Follow Up Questions

Is public transportation popular in India?

Yes, public transportation is quite popular in India especially buses and trains. I think its mainly because a lot of people can't afford their own vehicles.

What can be done to improve public transport services in your hometown?

I think government can take many steps to improve public transport. Firstly, the buses could be made more frequent. Secondly, work needs to be done to make public transport run on time. Finally, it could be made more eco-friendly. For example, the government could launch electric buses.

What leisure facilities could be used by people of age groups?

I think most leisure facilities could be used by all. For example, people of all age groups can enjoy multiplexes and shopping malls. Parks are another example of a leisure place, which could be used by all age groups. I think only sports stadiums are an exception as they are primarily used by the younger generation.

Do you think young people in your country like going to the cinema?

Yes, of course, young people like going to the cinema as the cinema experience is much better than watching movies at home. Moreover, it also provide a break from the monotony of daily life.

How is the subway system developing in your country?

In tier 1 cities like Delhi, Bombay and Kolkatta there has been a very fast development in subway system. However, in tier 2 and tier 3 cities, there is no development. I think it is not financially feasible to have subways in smaller cities.

What transportation do you use the most?

Personally, I travel the most by the two wheeler. It offers the convenience of my own vehicle and moreover, it is easier to find parking for it. However, I do travel by buses and trains when I have to travel longer distances.

2. Describe something you did that made you feel proud

You should say:

What it was

How you did it

What difficulty you had

How you dealt with the difficulty

And explain why you felt proud of it

- Whenever anyone achieves anything, he or she is very proud of it.
- What may be a simple thing for one person may be an achievement for another.
- For me overcoming my glossophobia was a very difficult thing.
- I used to be very stage shy and could never speak in front of an audience.
- It so happened that once I participated in an environment fair held in my hometown.
- We were a team of four students – Mohit, Rohan, Ravi and I.
- We had to make a model on pollution.
- It was very difficult to collect ideas for the model, but our teacher, MrsPromilla helped us.
- We collected all data from different sources like the internet, library, magazines and so on
- We presented all three types of pollution – air, water and noise pollution - on thermocol
- In this project we showed the causes, effects and ways to control pollution
- We had to speak turn wise on our model.
- I remember I was very afraid to speak.
- But my other friends gave me the confidence. I felt very good that I was part of that team.
- I spoke very well that time.
- Getting over my glossophobia was an accomplishment for me.
- I felt very good after that.
- We won the first prize in this competition.

Part 3 Follow Up Questions

Which one is more important, personal goals or work goals?

I think both are important in their own ways. We can never be happy if we fail to achieve either. Happiness in life depends upon work life balance, which is only possible if sacrifice neither on our personal goals nor on our work goals.

Have your life goals changed since your childhood?

Yes, in fact so many times. When I was very young, I wanted to become an astronaut. Then, I wanted to join the Merchant Navy. I remember when I read Harry Potter, I wanted to become a writer. So my life goals have changed from time to time.

Does everyone set goals for themselves?

No, I think only people who are ambitious set goals for themselves. Most people go with the flow and live life as it happens. Also, what we plan and what actually happens to us is quite different. So, even if people set goals, they end up doing something completely different at the end.

What kind of rewards are important at work?

I think both monetary rewards and appreciation are important. People like to feel appreciated when they work harder. For example, they want their employers to recognise the efforts in front of others. The monetary rewards also provide an extra incentive for them to work hard.

Do you think material rewards are more important than other rewards at work?

I think both are equally important. Many people think that people only care about monetary rewards, but I think other rewards are equally important. People care about their treatment and appreciation along with the monetary rewards.

What makes people proud of themselves?

People feel proud of themselves, when they achieve something challenging. In other words, they feel proud whenever they are able to achieve something that few others are able to achieve. It makes them feel special and different as they are able to do something that most others failed in doing.

3. Describe a picture/photograph of you that you like

You should say: m@kka|ielts

- Where it was taken/drawn
 - When it was taken/drawn
 - Who took/drew it
 - And explain how you felt about it
-
- Nowadays, almost everyone has become a photographer.
 - The smartphones of today have made it possible.
 - I click many selfies with my phone and keep deleting those, which don't turn out good.
 - Actually, I become very conscious in front of the camera and the photographs usually don't look natural.
 - Here, I would like to talk about a time when a professional photographer clicked a photograph of me, which has come out very nice and is my favourite pic of me.
 - I remember it was my cousin's wedding two months ago.
 - I was wearing my new silk suit.
 - After the main function, we were all dancing like mad to the tune of DJ
 - All my cousins were on the floor.
 - The cameramen were there covering it all.
 - Later on, we asked the photographer to give us all the photos and videos he had captured in our external drive, so that we could see them and pick out the best ones.
 - The photographer was very reluctant to give all the coverage to us, but we insisted and he had to give in.
 - All my photographs on the dance floor were good, but one was exceptionally good.
 - Two of my cousins are also there in the pic and all are looking good.
 - We were all so engrossed in dancing that no one was conscious.
 - All of us are in a typical Bhangra pose.
 - I was wearing a yellow suit with green embroidery and matching jewellery.
 - One of my cousins was in majenta suit and the other one in royal blue.
 - This picture has come out very colourful.
 - My aunt got this photograph enlarged and framed and gifted one copy to all three of us.
 - Now this is adorning the wall of our living room.
 - Whenever, I see this picture, the memories of the whole wedding come in front of my eyes.

2. What do people use to take photos these days, cameras or phones?

I think phones are widely used for taking photos these days, as compared to cameras. Smartphones, with their increasingly powerful cameras, are convenient and always at hand, making them a popular choice for everyday snapshots and sharing on social media.

3. Is it difficult for people to learn how to take good photos?

Well, learning the basics of taking good photos isn't difficult. With a little practice, anyone can capture nice pictures. 4. How do people keep their photos?

People these days tend to use a mix of methods to keep their photos. Some keep them in a digital format whereas some like to print them. I keep mine on my phone for easy browsing. 4. Describe something that you did with someone/a group of people

You should say:

- What it was
 - Who you did it with
 - How long it took you to do this
 - And explain why you did it together
-
- One of the most memorable activities that I did with my school friends was a weekend camping trip.
 - We had been planning for this trip for weeks, and we were all excited to finally be able to spend some quality time together in the great outdoors.
 - The trip started early on a Friday morning, when we all met at a designated location to pack our gear and set off on our journey.
 - We had planned to camp at a nearby hill station called Kasauli, and we had all brought our own tents, sleeping bags, and other essentials.
 - As we drove to the hill station, we chatted and laughed, eager to start our adventure.
 - Once we arrived at the hill station, we set up our campsite and started to explore the area.
 - We hiked through the forest, taking in the beautiful scenery and enjoying the fresh air.
 - We stopped to have a picnic lunch by a stream, and we even went swimming in a nearby lake.
 - The evenings were spent around the campfire, telling stories and roasting vegetables and meat.
 - We laughed and joked, and it was a great way to bond with each other.
 - We even played games and sang songs; the memories of that night are still fresh in my mind.
 - On the second day, we decided to go on a longer hike.
 - We set off early in the morning, and the hike was challenging, but also very rewarding.
 - We were able to see some amazing views from the top of the mountain, and we even came across a waterfall.
 - It was a great way to spend the day, and we were all proud of ourselves for making it to the top.
 - On the last day, we packed up our gear and said goodbye to the beautiful campsite.
 - We all hugged each other, and promised to do it again soon.
 - Overall, the camping trip was an unforgettable experience.
 - The reason why we did it together was because it was a great way for my friends and I to spend time together, and to bond in a way that we never had before.
 - We were able to disconnect from the world for a little while and reconnect with each other and with nature.
 - It was a weekend filled with laughter, adventure, and memories that will last a lifetime.

Part 3 Follow Up Questions

1. How do you get along with your neighbors?

I have a very good relationship with my neighbors as I have known them for more than 10 years now. It almost feels like that they are part of our family now, as we spend a lot of time at each other's place. We support each other during both good and bad times. Sometimes I think that our neighbors play a more important role in our lives as compared to our relatives.

2. How do neighbors help each other?

Neighbors can help each other in a variety of ways, such as by lending tools or household items, watching each other's homes when one is away, assisting with household repairs or projects, offering to take care of pets or children, and sharing gardening or cooking tips. They may also look out for one another's safety and well-being, and provide emotional support during difficult times. Additionally, neighbors may work together to improve the community through volunteerism or organizing neighborhood events.

3. Do you think neighbors help each other more often in the countryside than in the city?

It's possible that neighbors may help each other more often in rural or suburban areas compared to urban areas. The reason being that in rural or suburban areas, neighbors may have a greater sense of community, and may be more likely to know each other personally, and therefore be more likely to offer help when needed. Additionally, in rural and suburban areas, people may have more opportunities to interact with each other, such as while working on shared projects or participating in community events.

4. How do children learn to cooperate with each other?

Children learn to cooperate with each other through a combination of socialization, modeling, and direct teaching. For example, they can learn cooperation by playing with other children, as they learn to share toys, take turns, and work together to achieve a common goal.

5. Do you think parents should teach children how to cooperate with others? How?

Yes, I believe that parents play a vital role in teaching children how to cooperate with others. Cooperation is an important life skill that is needed in a wide variety of contexts, such as in the family, at school, in the workplace, and in the community. Children learn by example, so when parents demonstrate cooperation and collaboration in their own relationships and daily activities, children will learn how to do the same. Parents can also provide opportunities for children to practice cooperation by setting up games and activities that require teamwork. Additionally, parents can teach children the importance of listening to others' ideas and opinions, compromising, and taking turns.

6. Do you think it's important for children to learn about cooperation?

Yes, it is very important for children to learn about cooperation. Cooperation is a key social skill that is essential for success in many aspects of life. Children who learn to cooperate with others are more likely to develop positive relationships and achieve academic success.

 - I learnt about the struggles he faced till now.
 - How he narrowly missed qualifying for the Olympics in 2016.
 - He could have scored a medal then as well.
 - However, the narrow miss strengthened his determination to perform well this time.
 - He said that he could have won a silver or a bronze medal the last time, but he might not have won the gold medal this time if he had won in 2016.
 - Both the national government and government of Haryana, his home state, awarded him financial awards for his amazing feat.

I don't think animals should be kept in zoos. It's important for wild animals to have their natural habitat. While parks can be nice for people, it might not be the best environment for some animals. At what age should children start making their own decisions? Why?

Once children reach high school, parents should let them make their own decisions. When they are younger, parents can help them with their options and help them choose. But as they get older, parents should let them decide and even let them face the consequences of their decisions. It's a learning experience for them. When the decisions are complex and complicated, like choosing a major, parents should advise but let children make the final decision.

What influences young people more when choosing a course, income, or interest?

I think it differs from person to person. Some young people choose a career/course based on the income and job opportunities in that field. They want to afford the necessities and give their families a comfortable life. Some choose based on their interest, even if the area they choose is not that high paying. They choose their happiness and passion over money. Sometimes, a person may be very passionate about a career that also offers a big paycheck.

Do young people take their parents' advice when choosing a major?

Yes, most young people take their parents' advice when choosing a major. They understand that their parents have more experience and want their children to be successful. Their parents may have different views, and eventually young people should choose a major they want.

Besides parents, who else would people take advice from?

Students can also take advice from teachers and school counselors. Teachers have closely worked with students and know their strengths and weaknesses. School counselors can also help students decide on a career path. They can help them narrow down their interests and capabilities and choose a major that will align with their career goals.

Why do some people prefer to study alone?

Some people prefer to study alone because they can concentrate better when they are by themselves. They can also work at their own pace and understand the concepts of one topic thoroughly before they move on to the next topic.

33. Describe a public facility(for example a museum or a library) that been renovated and improved recently

- What the facility is
 - When it was renovated and improved
 - What has been renovated and improved
 - And explain how you feel about it
-
- I live in a small and beautiful town, Phagwara,
 - However, it is an old historical town and because of this many of the buildings are outdated.
 - Many of the buildings have also been recently renovated.
 - One of these is the town library.
 - It was renovated about a year ago.
 - The main reason for the renovation was to accommodate a computer section in the library.
 - Many of the residents had been demanding a renovation and ultimately the budget was passed for the renovation in 2019.
 - The previous library building had only two floors and there was little space for computers.
 - Most of the people felt that there should be computer section, where information can be searched online as well.
 - They had made a temporary arrangement for the computers
 - They had installed a few computers on the side, but as there were no fixed power outlets in the wall and so they had used open wiring.
 - It was neither aesthetically pleasing nor very safe.
 - So, finally, they made a new floor for the computer section.
 - Moreover, they also added a section for CDs and DVDs.
 - Finally, as the building would have three floors after the renovation, they had also installed an elevator.
 - I think it was a really needed change.
 - I couldn't welcome it more. I had stopped going to the library because there was no way to access information online.
 - After the change, I have been going there regularly.
 - I just have one complaint, it happened a lot later than it should have.

Part 3 Follow Up Questions

1.) What are the benefits of public facilities?

There are many benefits of public facilities. Firstly, they bring people together as these facilities are shared by people. Secondly, it helps people enjoy facilities even if they are not able to afford them on their own.

2.) Why are some public transport methods popular, such as the subway?

I think subways have 3 main advantages over other means of public transportation. They are faster, they are comfortable and they are generally more frequent and reliable than others modes. They are also safer as there are no chances of road accidents.

3.) Why are some public transport methods unpopular?

I think the major reason for anything transport method being unpopular is speed. People can compromise on cost and comfort but they cannot compromise on time. If a public transportation takes significantly longer than cars or other modes, it is going to be unpopular.

4.) What kind of transport do young and old people prefer?

I think the old generation gives a little more importance to cost over the young. So the old prefer cheaper means of transportation than are comparatively cheaper. Also, the young are more accustomed to comforts and luxuries and thus they prefer their own vehicles much more than public transportation.

5.) Do you think people feel happier when they are in a park or in a coffee shop? Why?

I think it really depends upon the person. Some people feel happier being in close contact with nature, others need comfort like AC and proper seating which they can get in a coffee shop. Personally, I go to the park with my dogs and I love spending time with them. So, I am happier at the park.

6.) Is a public park necessary in every area? Why?

I think public parks are absolutely necessary. I think contact with nature is certainly essential and we are missing that because of our busy lifestyles and lack of parks. Moreover, parks purify the air and provide places for people to socialise with other community members. Last but not least, it should be a crime to keep a pet like dogs and not take them to a park. So, there should be a park in close vicinity to every house.

34. Describe a daily routine that you enjoy

You should say

- - What it is
- - Where and when you do it
- - Who do you do it with
- - Explain why you enjoy it

- I have many routines that I do every day, such as taking a bath, preparing breakfast for myself and sometimes my parents, going for a walk, studying, going to the gurdwara, and so on.
- Here I would like to talk about a daily routine that I really enjoy and look forward to.
- It is doing a 3-mile walk at home with Leslie Sansone.
- Leslie has her own walk at home app, in which she has these daily walks for people of all age groups.
- My aunt told me about it.
- I used to go for a morning walk, but could not go when it was too hot or too cold or raining outside.
- So, my routine was disrupted.
- I have been doing this walk every day for the past year.
- I have the app on my phone, but I prefer to open the webpage on my laptop as the screen is bigger.
- Sometimes my mother joins me for the walk.
- We do it in our living room as it is quite spacious.
- I enjoy it because it gives me a feeling that I'm doing something for my body.
- I used to be a bit overweight, but now I have lost around 5 kg and my body shape also looks and feels much better.
- Earlier I used to feel lazy and tired, but now I feel much more energetic and healthier.
- I also used to suffer from insomnia, and would toss and turn in bed for a long time before I actually fell asleep.
- Now, I fall asleep within minutes of touching my head on the pillow.
- Because of a good night's sleep, I have more concentration in my studies too.
- This walk can be done any time of the day, but I like to start my day with it.
- Sometimes, if my morning is busy, I do it in the afternoon or evening.
- There are many other walking routines on the net, but I like walking with Leslie the most.
- She adds upper body and abs exercises with the walk and that helps tone up the whole body.

Part 3 Follow Up Questions

1. Should children have learning routines?

Yes, of course they should have learning routines. These add discipline to life. When children follow routines, they learn to manage time. I believe all routines teach something, so can be a learning experience. For example, a simple routine of a family meal can teach children many things when they share their days happenings with their parents. They learn many social skills and develop a bond with their family. A routine of going to bed in time can develop children's mental health.

2. What are the advantages of children having a routine at school?

There are many advantages of having routines at school. It gives students a predictable day at school. So, they feel more confident and secure. It also saves time. They don't have to ask questions about what to do next. Teachers have already streamlined things for them. It becomes easier for students to become focused and attentive.

3. Does having a routine make kids feel more secure at school?

Definitely yes. For younger children, a routine engages them in learning and helps them feel safe in their environment, while it helps older children know what to expect and feel more comfortable. This is why classroom routines are important.

Routines in the classroom make class time more enjoyable and productive. They offer students a sense of stability. By having classroom rules and procedures that teachers set, their students will know their expectations.

4. How do people's routines differ on weekdays and weekends?

Weekdays and weekends are totally different, so their routines are also different. Weekday routines are good, but on weekends people can afford some flexibility. Of course, a person should also plan weekends, otherwise they will disappear without giving you any time for fun and relaxation. A weekend should relax a person after a busy week and also set him up for a successful week ahead. Weekend should incorporate family time, cinema time, outing time, socialising time and all what cannot be done on weekdays.

5. What daily routines people have at home?

People have daily routines like a family meal, a morning prayer, doing household chores together and so on. Every family has their own routines set up, which make things easier for all members. For example, in my family my father buys vegetables, fruits and grocery, while my mother does the cooking and laundry. My father checks if all doors, windows and main gate is locked before going to bed. I take my dogs out for a walk twice a day. These routines are more or less fixed.

6. What are the differences in people's daily routines now and 15 years ago?

Life was slower and simpler in the past. People spent less time on social networking sites than in the past, so they had more time to socialise. Routines included being with other people. Today's routines are more about spending time with oneself and technology.

35. Describe a place you visited where the air was polluted

You should say:

- Where the place is
 - When you visited it
 - Why the air was not good
 - And explain how you felt about the place
-
- Unfortunately, India is one of the most polluted countries in the world.
 - And, the pollution problem is becoming worse day by day.
 - Today, I am going to talk about a place which is always in the news for the dangerous levels of pollution.
 - I visited it last December with a friend.
 - He had a visa interview for US and as his parents couldn't accompany due to work, he asked if I could.
 - I wanted to buy some electronics from Delhi, so I gladly accepted.
 - However, now I do regret visiting Delhi.
 - From the moment we landed in Delhi, I could feel the pollution.
 - My eyes were burning and I had trouble breathing normally.
 - I felt there was something wrong with the air.
 - I had listened to Delhi's high pollution levels in the news, but it was way worse than I expected.
 - It was very uncomfortable to even stand outdoors.
 - Delhi's pollution is mainly attributed to three reasons.
 - First is obviously private vehicles, secondly, the stubble burning in neighbouring states and finally festivals like Diwali, where crackers are burnt.
 - In fact, I visited nearly 15 days after Diwali, still the pollution levels were so high, I can't even imagine how it would have been just immediately after Diwali.
 - I had to immediately buy a mask and covered my eyes with sunglasses, which I didn't take off till I reached inside my hotel room.
 - Delhi is India's capital, but I am ashamed that we have been unable to solve this problem.
 - Both the state government and central government promise action but nothing is actually done to reduce pollution.
 - I have decided, I am not visiting Delhi till the situation improves for good.

Part 3 Follow Up Questions

Is there more pollution than the past?

Yes, definitely there is more pollution now than the past in India. The main reason is increasing construction activities, industries and vehicles on the world. However, in some countries governments have been successfully able to reduce it by taking stringent action like banning industries in cities, promoting electric vehicles and switching to solar and wind energy from fossil fuels.

Do you think cities are cleaner or dirtier than the countryside areas? Why

I think cities are definitely dirtier as more waste is generated in cities than in rural areas. There are more vehicles and less greenery so the air is also less cleaner. I feel like nature has a capacity to certain levels of pollution and air and in the countryside we are below that level, but in cities we have far exceeded nature's natural capacity to do so.

What can factories and power plants do to reduce pollutants?

To begin with, they can switch to less polluting fuels or non polluting fuels like wind power and solar power. Moreover, they should relocate to the outskirts of the cities to reduce the impact of city residents. However, this could be expensive and cannot be done immediately. In the short term, they can increase the height of chimneys.

Do you think wind has any effect on pollution? How?

Certainly yes. I am not sure how, but I think wind just spreads pollution over a larger area. I also read in a book that coastal areas are less polluted because of land breeze and sea breeze, so I am sure it does have an effect.

In what ways can air pollution be reduced effectively?

I think it is not a simple solution or it would have been done already. I think we should address the major causes of pollution- for vehicular pollution - I think the best answer would be to switch to electric vehicles. In case of industries switching to solar energy and wind energy and finally we should avoid burning waste and recycle it instead.

Do you think many companies have been forced to reduce pollution?

Yes in recent years, many companies have faced stringent fines and taxes for exceeding pollution levels. So companies have taken actions. For example, in my city, one of companies was forced to shut down for a whole month because of the toxic exhaust fumes. They also had to install waste treatment plants and now most companies treat their waste instead of dumping it directly into rivers and lakes.

36. Describe a historical building you have been to

You should say:

- Where it is
 - What it looks like
 - What it is used for now.
 - What you learned there
 - And how you felt about this historical building
-
- Every year, my parents used to take us to different city in India, during summer vacations.
 - During these visits, we visited various historical places.
 - One such place, which really left a big impression on me was the Red Fort in Delhi.
 - I visited it with my family when I was very when I was in 9th or 10th standard
 - The Red Fort was built by Shah Jahan, when he shifted his capital from Agra to Delhi.
 - After that, Red Fort was the main palace of Mughal Kings till their eventual decline.
 - Today, it is just a historical attraction.
 - The Prime Minister gives a speech from the Red Fort on Independence Day, 15th August every year.
 - The Red Fort is in surprisingly amazing conditions despite its age.
 - Most of the red marble has withstood the vagaries of nature.
 - However, I remember some of the walkways were crumbling due to lack of repair.
 - Originally, it had a lot of beautiful artwork and jewels.
 - However, they were looted during one of the invasions by the Persians.
 - Later, some of the other artwork and the Peacock Throne were taken to Delhi after the failed India Independence uprising.
 - It was really impressive visiting Red Fort.
 - It represented the centre of India during its glory.
 - Despite being looted and attacked many times, it still gives off a feeling of immense power and strength.
 - It generated a sense of great patriotism and national pride in me.
 - Moreover, the impressive construction shows the skill off our past builders.
 - I would love to visit it again in the future.

Part 3 Follow Up Questions

Why do people visit historical places?

People visit historical places for many reasons. Mainly, it connects people with their roots and gives them an opportunity to learn about their cultural heritage. It instills a sense of patriotism and pride. In today's time, it combines learning with entertainment, an opportunity to learn something while having fun.

Do Indian people like visiting historical places?

Yes, I think they are always crowded. Whenever, I have visited historical places, there is always a huge number of people at these places. So, people do really like to visit these places. I think Indian people are very nationalistic and visiting places is about reigniting that feeling of pride and patriotism.

Should government fund protection of historical places?

Yes, I think it is the government's responsibility to protect our culture and past and protecting these buildings is paramount for that purpose. Today, people are losing interest in visiting these places and ticket prices are not enough to fund maintenance of these buildings, so the government needs to come forwards to make sure they are protected.

Is it necessary to protect historical buildings?

I think the importance of historical buildings cannot be overstated. They represent our roots, our cultural heritage. They are a reminder of our historical achievements in architecture. Even today, people are not sure how the Pyramids or Taj Mahal was built without today's modern technology. I think it would be shame to let them go into decline.

 - My friend had refused to cut the cake without me.
 - So, everyone was waiting on me.
 - I apologised to each and every person there.

- Here, I would like to mention a time when I wore my favourite dress.
- It was my 25th birthday so I had to wear my favourite clothes.
- Actually, my birthday always falls (comes) in winters and it is really hard to decide what to wear.
- But this was the only birthday when I was already sure about my clothes.
- Instead I should say, I was waiting to wear these clothes since long.
- The attire was nothing special but a simple white jacket for winters and a pair of denims but it was really close to my heart because it was gifted to me by my brother, who migrated to the United Kingdom three years ago.
- When he started earning, he got this for me out of his first salary. So, it had a sentimental value attached to it and I was dying to wear it on some special day.
- What could be more special than my birthday? So, I wore this lovely jacket and comfortable jeans.
- As I already mentioned that I was deeply excited to wear it. I felt immense happiness after wearing it and felt like I am truly blessed and loved by my family. The happiness is never of the materialistic things but about the gesture of care and concern the other person has for you.

Do old people change their style of dressing?

I am sure some old people do, but in my family, the older generation have not changed their style of dressing. 10. What jobs need employees to be talkative? m a k k a r _ | E L T S

The first job that comes to my mind would be of a Radio Jockey because talking is the primary thing they have to do in their job. They are supposed to entertain people by talking a lot, cracking jokes. Another job, I would say, could be a teacher as they have to give lectures to the students, which involves a lot of speaking.

11. Should children be encouraged to talk more?

I believe teaching communication skills to children is very important and they should definitely be encouraged to speak. They should also be taught when they should speak more and when they should speak less because speaking more is not important but speaking the right thing is.

Yes, there are many places in my country where people can relax. As a first option, they can spend their leisure time in parks and open areas where they can just sit around or talk to other people. Mostly people think that relaxation means to just sit around and give rest to the body after a hard day at work or doing some physical activity but I think in today's world relaxation is more about the mind. Physical activities like sports help in release of hormones such as endorphins and dopamine which make one feel relaxed.

4. Do you think that spending time in front of a screen helps people relax?

I think it depends on the number of hours a person is spending in front of a screen, and the content they are watching. - When you wear it?
 - Who bought it for you?
 - What does it look like?

- Uniform is very important to maintain discipline in schools or even at workplace.
 - It also helps in distinguishing between customer and employees or students of different schools.
 - This is why every place has a different uniform.
 - I do not wear any uniform now, but I used to wear one in my school.
 - In fact, in my school we had different uniforms for weekdays and different for Saturday which was the games day.
 - For the weekdays, the students had to wear white shirt with steel grey bottoms along with a tie, belt and black shoes.
 - But for the games day, it was coloured T-shirts and white bottoms with the school belt and canvas shoes.
 - During the winters, we also had to wear a blue coloured blazer with the school motto woven on its pocket.
 - This was my favourite part of the uniform as I looked really handsome after wearing it.
 - Also, our school uniform was comparatively better looking as compared to other schools in town, so I felt a little bit proud about it as well.
 - But I really hated wearing the games day uniform because the white color gets dirty very easily.
 - My parents used to buy the uniforms for me.
 - They bought it every alternate year because of my physical growth the old uniforms would get shorter.
 - I also remember that I used to take great care of my uniform and kept it neat and tidy. This also got me compliments from my teachers.

Part 3 Follow Up Questions

1. Why should students wear uniforms?

Uniform instills discipline, a sense of belongingness and pride in a person. Besides a uniform makes it easier for the teachers and authorities to keep count of their students. And for the parents it's an option that brings monetary respite as they do not have to buy a lot of clothes for their children.

2. Why should people at work wear uniforms?

Uniform at work has similar benefits as at school. Besides this certain professions need a uniform to protect them from hazards (e.g., firemen) or to make them stand out (e.g.,doctors)so others know where to find them for assistance

Advantages are a homogeneous look, discipline, sense of belonging, protection etc.

Disadvantages are that it becomes monotonous and takes away the sense of identity and style every individual has.

4. Can people tell a person's personality by his or her clothes?

Yes, it has been said , 'a tailor makes a man', and very often one can get a fair amount of idea about the personality of a person from the clothes she/ he wears. Eg somebody who dresses up in bright vibrant clothing has to have a sunny outgoing personality . Anyone who wears conventional clothes in similar designs and colours would suggest she/ he is very fixed her/his ideas.

Yes, companies should definitely do that because when employees will participate in the designing process they will have more respect for their uniforms. They will have a sense of ownership and hence they will wear it more proudly.

10. Can people tell someone's personality by his or her clothes?

I think it is very difficult to judge someone's personality by looking at what they are wearing. Every individual is different, some like fashion and some do not. So a person wearing simple clothes could be a highly intellectual person or could be an average guy. We can only find out once we talk to them.

11. What color would catch people's attention most?

I think the bright colors catch the attention most. Colors like red and yellow normally have a striking effect. Also, these colors are not worn by many people, so, one's chances of being the odd one out become higher.

 - Where you had the conversation
 - What you talked about
 - And explain how you felt about the experience.
-
- I have had many interesting conversations with my grandparents, but here I would like to talk about an interesting conversation I had with my friend's grandfather, S. Manmohan Singh.
 - He is in his late eighties.
 - We had this enlightening conversation in the comfort of his living room during one of my visits to his house.
 - During our conversation, his grandfather shared captivating stories about his experiences and insights into the Indian freedom struggle.
 - He vividly recounted incidents from that era, talking about the sacrifices made by countless individuals who fought for India's independence from British rule.
 - He narrated tales of bravery, and unity among people from different walks of life who came together for a common cause.
 - We delved into various aspects of the freedom movement, discussing the pivotal role played by Mahatma Gandhi, Jawaharlal Nehru, Subhas Chandra Bose, and other prominent leaders.
 - He explained the significance of events like the Salt March, Quit India Movement, and the sacrifices made by freedom fighters to secure our nation's freedom.
 - Moreover, my grandfather emphasized why it's crucial for young people to be aware of India's struggle for independence.
 - He told that understanding this history brings a sense of patriotism and an appreciation for our hard-earned freedom.
 - This conversation was incredibly enlightening and thought-provoking.
 - It made me realize the importance of acknowledging and learning from our past to shape our future.
 - Hearing first-hand accounts of the struggles during India's fight for independence was not only educational but also deeply inspiring.
 - It instilled in me a sense of pride and respect for the sacrifices made by our ancestors.
 - I realized that the lessons from the past should not be forgotten but cherished and carried forward by younger generations.

Part 3 Follow Up Questions

1. How do people have a conversation with an elderly person?

Most people talk more gently with children and elderly. But many a times it has been seen that some people lose patience with older people because of their impaired hearing and slow responses so they become rude while conversing with them.

2. What can young people learn from of people?

Old people have a lot to teach youngsters because of their age and experiences and also what they may have learnt academically and professionally. They can teach patience and empathy to the younger generation.

3. Do you think old people can work better than young people?

Yes and no, in my opinion it depends on what the nature of the work is. If it is something that requires patience, repetition, fine detailing they would do a better job than youngsters who are impatient. Tasks involving technology and speed are best left to the younger generation in my view.

4. What are the advantages of having people of different ages living in the same house?

Having a mix of varied age groups living under the same roof can develop understanding, patience and empathy in everyone. Besides it may foster tolerance for different viewpoints and different age groups as also give them all an idea of the needs and responses each age group has.

5. Has old people's life quality improved when compared to the past?

Yes, definitely there is an improvement in the quality of life of everyone in the society not just old people. In case of old people there are more health care facilities, more accessible transportation and newer means of being connected to family and friends.

6. Do old people share the same interest with young people?*

With increasing age one's faculties, needs and interests change to a large extent. Eg., if one loved high speed driving in younger age, one may not like it in older age as one's senses slow down. So young people's interests and older ones' may not go with each other

7. Do you think old people and young people can share the same interest?

It may sometimes be difficult for old people and young people to share the same interests. Young people are generally more energetic, so they prefer outdoor sports, but old people can only play those games which are not physically trying. It would be wrong to say that they cannot share the same interest. They both can share the same interest in TV programs, movies, indoor games, etc.

8. What skills can the old teach the young?

Old people today have seen a lot of changes in their lifetime. My grandfather has told me many stories of how difficult his life was when there were no vehicles and horses were used for transportation. He has also seen a lot of technological advancements. For example, the evolution of music started with radio and was followed by gramophones, cassette players, cd's and dvd's, and finally I-Pods and Mobile Phones. The most important life skills such as adaptability, versatility and openness to change, can be taught by the old to the young.

9. What skills can the young teach the old?

Young people are faster at learning about modern technology and better at operating gadgets. They can definitely teach these skills to old people. Also, since young people are now entering various businesses, other young people understand them and can do a better job of negotiating prices of goods and services. This too is an important skill for old people who are always keen to get a good bargain.

10. Do you think the old people should live with their family?

Ideally they should. But, if not possible for some reasons, they should be in old age homes and not live alone. Living alone can be dangerous for them.

-
- I have seen many busy periods in my life, such as during exams or when we have some guests over from abroad for a short stay.
 - However, one of the busiest periods I've experienced was before my sister's wedding, which took place last summer.
 - In the months preceding the wedding, I found myself deeply involved in various tasks and responsibilities related to the event.
 - As my sister's wedding was a significant family affair, there were numerous arrangements and preparations that needed attention.
 - I felt very important when my parents involved me in the arrangements.
 - Primarily, I assisted in helping to choose the venue, arranging meetings with caterers, florists, and decorators, and managing the guest list.
 - The days just before the wedding were incredibly hectic.
 - I had to oversee last-minute details to ensure everything was in place for the big day.
 - From attending dress fittings to organizing transportation for guests, each day was filled with numerous tasks to complete.
 - Despite the immense busyness and occasional stress, the experience was incredibly fulfilling and rewarding.
 - Witnessing the joy and happiness on my sister's face during her special day made all the hard work worthwhile.
 - Moreover, it brought our family closer together as we collaborated and worked tirelessly to make the wedding a beautiful and memorable occasion.
 - The sense of accomplishment I felt after seeing the successful outcome of our efforts cannot be explained in words.
 - Overall, although it was an extremely busy period, it was an unforgettable and joyful experience.

Part 3 Follow Up Questions

1. Are you often busy?

Yes I am mostly busy during the weekdays but on weekends I like to take out time for myself.

2. What are the advantages and disadvantages when people keep busy?

Well if someone is busy in work or studies then the biggest advantage is that they will be able to achieve success in life and also they don't have free time to stress about other things in life. The only disadvantage that I can think of is that people who are busy are not able to devote much time to their relationships.

3. Do you think children should learn through playing games or under pressure?

I would definitely prefer the first option because I don't think children are able enough to handle pressure situations. Putting pressure on them like for studies can take their interest away from learning.

4. What kind of pressure people may experience at work?

The biggest pressure at work is obviously to meet the deadlines to complete the assigned tasks. Apart from this, there people could sometime feel pressurised about politics in the office environment, especially with their colleagues.

5. How does technology help with time management?

I think technology is constantly evolving in helping us do our tasks in a more efficient manner. For effective time management people use project management software and applications like calendars on their laptops and mobiles to set clear deadlines and with technology they are able to track them easily.

6. Does technology distract people?

Yes, technology can be distracting at times, mostly due to overuse. For example, we often hear stories when people start learning something productive or a skill from a youtube video and somehow they end up watching cute cat videos for 3 hours. 😊

7. Do you like the fast pace of modern life?

I do not like the fast pace of modern life much, but I think that there is no escape from it. It has become a part of our lives.

8. How do you feel when you are really busy?

When I'm busy, I don't have time to think of anything, and that keeps me stress-free.

9. What's the best way to deal with stress?

The best way to deal with stress is to remain busy. One can have hobbies to keep one busy. If the person is busy, he doesn't have time to think of depressing things.

10. What kind of lifestyle is suitable to people in modern society?

People in the modern society, are busy. I think the fast-paced life style suits them the most. Those who are not living the fast life seem to be living in some other era.

11. What relaxation techniques do you usually use?
I do some yoga, and listen to soft music to relax.

49. Describe a time when you used a map.

You should say:

- When it was
 - Where you were
 - What you did
 - And explain how you felt about it.
-
- Using the GPS when traveling by car has become very common, especially while visiting new places.
 - One particular incident that comes to mind when my family and I heavily relied on a map was when we had to attend a wedding at a new marriage palace in Ludhiana, India, and ended up getting lost on the way.
 - It was the wedding of the daughter of my father's colleague, and we were all invited.
 - They live in Ludhiana, and so they had booked a newly opened Marriage Palace named Occasions in Ludhiana.
 - It was in the outskirts of Ludhiana.
 - It was a sunny afternoon, and we put on the GPS directions on our phone.
 - We set off excitedly in our car from Phagwara.
 - However, the route to the new marriage palace seemed confusing due to recent construction and road diversions.
 - We realized that the GPS wasn't entirely accurate.
 - We found ourselves taking wrong turns and ending up in unknown places.
 - Finally, we decided to take the help of locals.
 - As it was a new marriage palace, we could not get any help.
 - Ultimately, we had to rely on the GPS system only.
 - After a series of twists and turns, we managed to find our way to the new marriage palace.
 - Despite the delay and the initial stress of being lost, the experience of using the map and navigating through the unknown added a unique thrill to our journey.
 - Though the situation was a bit challenging and caused some anxiety initially, the teamwork involved in figuring out the correct path and eventually arriving at the destination created a memorable adventure.
 - I can never forget that wedding and how much effort we had to put in to reach there.

50. Describe a time you successfully did something difficult.

You should say:

- When it was
 - What you did
 - Where it happened
 - And explain how you felt about it.
-
- I Try to do things that I find difficult as I believe that once I do that difficult thing, I will have more confidence than before.
 - Here, I would like to talk about an incredibly rewarding experience I had when I was doing Sr Secondary.
 - It was winning a declamation contest amidst tough competition.
 - It happened during my final year of high school when our school organized an inter-school declamation competition.
 - I am an introvert by nature, and so public speaking was a daunting challenge for me.
 - However, motivated by my friends, I decided to participate.
 - Preparing for the contest was a very challenging process.
 - I spent weeks practicing tirelessly in front of the mirror and with friends.
 - The topic was on the importance of youth empowerment and education.
 - The competition took place at a renowned school in Mohali, Punjab.
 - When it was my turn to speak, I gathered my courage and delivered the speech with passion and conviction.
 - Despite initial jitters, I spoke confidently and emphasized the significance of empowering the youth through education.
 - When I concluded my speech I received a warm round of applause from the audience.
 - Ultimately, to my surprise and delight, I was announced as the winner of the declamation contest.
 - The feeling of accomplishment was great.
 - Overcoming my fear of public speaking and succeeding in a competition made me feeling elated and empowered.
 - I had stepped out of my comfort zone to achieve something I initially deemed challenging.
 - The experience instilled in me newfound confidence and a belief in the power of determination and hard work.
 - It taught me that facing difficult challenges can lead to personal growth and can pave the way for unforeseen successes.
 - Winning the declamation contest remains a cherished memory, serving as a reminder that with determination, one can conquer even the most daunting of tasks.

Or

Well, I have done many things in my life which I found difficult in the beginning but then with practice they became easy.

- For example, I found cooking to be very difficult at first but now I can cook anything easily by just following the recipe.

- But one challenging thing I would like to talk about today is when I assembled my own Personal Computer two years back.
- It was after my exams were over and I had requested my parents for a new desktop.
- All my friends had bought branded Personal Computers from Dell and HP which came pre-installed with all the software.
- However, being a gamer, I was more interested in getting a gaming computer with a more powerful configuration but buying a branded gaming PC was out of my budget.
- So, I discussed it with one of my techie friends and he advised me to buy the computer parts separately and assemble it on my own, as it would cost much less than a branded PC.
- Since I did not have much knowledge about computer hardware at that time, it seemed very difficult to me to do this task on my own.
- But I still decided to go ahead and started reading a book on computer hardware and also started to watch computer assembly videos on youtube, which gave me a lot of confidence.
- Through the videos I learnt a lot about the different computer parts and their functioning.
- Finally, after I gained enough confidence, I ordered all the components online as it was much cheaper than the retail shops.
- It took me a complete day to put all the parts together and basically the most difficult part was building the CPU.
- One has to be very careful while installing the processor on the motherboard and then installing cooling fans over it.
- If this process is not done carefully it could lead to a short circuit and the processor could get damaged.
- Luckily, I was able to put it all together perfectly in my first attempt and when I pressed the power button, I heaved a sigh of relief.
- I was very nervous during the entire assembly process, but I also felt that if I hadn't read the hardware book and watched the videos on youtube, I would not have been able to do this thing on my own.

Part 3 Follow Up Questions

1. What kinds of jobs require people to be confident?

I think all jobs require a certain degree of confidence but the ones which involve dealing with customers require a lot more confidence. For example, if a salesperson is not confident enough then he will not be able to convince the customers about the product he/she is trying to sell.

2. On what occasions should children be encouraged? How?

I think children should be encouraged in those situations where they feel hesitant in doing something that is good for them. But also, the encouragement should be done to a certain limit, they should not feel like something is being forced upon them. For example, we can encourage children to learn something creative such as painting if they show interest in it. And to encourage them more, parents can take them to a museum so they can develop their interest further

3. How do you help children stay focused?

There are many ways in which children can be helped. First of all, one can provide them an environment which is free of distractions, like when they are studying, they should not be allowed to use cellphones. Another way to help them focus would be to teach them about meditation in which they have to focus on their breath or a single sound.

4. What challenges do young people face today?

Well, I think there are two main challenges that young people face these days. The first one is related to the mind and mental health, nowadays everyone is aware of the rise in depression and suicide cases among the youth. Another challenge faced by them is the ever-increasing competition in education or their professional lives.

51. Describe a situation when you helped someone.

You should say:

- What the situation was
- Who the person was
- How you helped them
- And explain how you felt after helping him/her.

- Man is a social animal.
- Giving and receiving help is part of living in society.
- One memorable instance where I offered assistance to someone in need was when I helped a blind person cross the road.
- It happened about 2 months ago.
- As I was waiting at a busy intersection, I noticed a visually impaired gentleman standing on the corner.
- It looked as if he wanted to cross the road, but was not sure as there was too much traffic noise around him.
- I approached him and asked if he needed help crossing the road.
- The gentleman, Mr. Singh, was grateful for the assistance.
- He explained that he needed to reach the other side but the traffic noise was making it challenging for him.
- Taking his arm to guide him, I waited for a suitable gap in the traffic.
- Upon safely reaching the other side, Mr. Singh expressed his gratitude, thanking me for the assistance.
- He shared a bit about his daily challenges in getting around independently, highlighting the importance of simple acts of kindness from strangers.
- Helping Mr. Singh cross the road left me with a profound sense of fulfilment.
- I realised that the small acts of kindness can have a profound impact on someone's day, especially when faced with challenges.
- It made me reflect on the importance of empathy and the significance of extending a helping hand to those in need.
- I felt a deep satisfaction in knowing that I had made a tangible difference in someone's life, even if just for a brief moment.
- Lending a helping hand, no matter how small the gesture, can create a ripple effect of positivity in the world.

Or

- Man is a social animal.

- This accident had just happened 2 minutes before.
- She and her husband were on a scooter and as they were coming out of the petrol pump a speeding car hit them and sped away.
- We parked our car on the side and came out to see if we could help.
- Her husband had minor injuries but she was in a bad shape.

- We immediately called 108 for help.
- It is the number of the free ambulance run by the government.
- Within fifteen minutes the ambulance was there.
- We did not move the lady because it could aggravate her injury.
- She was breathing properly but had a lot of pain.
- There was a first aid team headed by a doctor in the ambulance.
- The ambulance people picked her very carefully on a stretcher and immediately rushed her to Phillaur Civil Hospital.
- We took the number of other relatives of the patient from her husband and called them.
- Actually he was also very shocked because of his wife's condition.
- We took him to the Phillaur hospital in our car.
- Only after they were settled, we moved on.
- We were late for the wedding but we were happy that we could help some needy people.

Part 3 Follow Up Questions

1. Should people be very kind when they help others?

Yes, I believe one should be very polite and humble while helping someone in distress or need. A rude behaviour during such time would simply negate the kindness of the act. Also, one should not try to make it look like that they are doing a favour to someone and they expect the same in return.

2. Should children be taught to be kind to others?

The quality of being kind to others should definitely be inculcated in children. This will lead to creation of society with less suffering and more happiness. Moreover, children should be taught other values as well such as being honest and respectful.

3. Should parents help their kids with their homework?

Well, the homework is normally assigned to the children and not the parents, so I don't think that parents should help them in doing it. However, they should definitely monitor whether their children are completing their homework in time or not. Finally, for exceptional cases, when children are finding an assignment to be tough, they can ask for their parent's help.

4. What kind of advice should parents give to their children?

I believe that children mostly imitate the way their parents behave, so, the only advice that parents need to give their children is to always do the right thing. Also, they should do this by leading with example and not just expect their children alone to do it.

5. Should parents give children advice? Why?

Definitely yes, and the simple reason behind this is that the young minds are too fragile to distinguish between the right and wrong. They need constant guidance from their elder's experience to make the right decisions. If the parents are not there to guide the young they can easily go astray.

6. Can kids provide any help to parents?

Again yes, kids can assist their parents in multiple ways. This will also help them to learn new skills. For example, children can help parents in cleaning the house, may be with cooking or taking the dog for a walk.

7. Do you like helping others?

Yes, I like helping others. I feel very happy when I can be of any help to anyone. Whenever any person comes to me for help, I do my best to help that person

8. In your view should children be taught to help others?

Yes, children student should be taught to help others. They should be made to realize that if today they will help others, then tomorrow they will get help if they need help.

9. How can we encourage children to help others?

We can encourage children to help others by setting an example. If they see their elders helping others they will automatically learn to help others.

10. Do you think people are less willing to help others these days compared to the past?
Yes, I think so. Today's life is very fast. People have become workaholics. They have become self centered. They have no time to help others.

11. Do people trust others as much as they used to in the past?
No, I do not think so. My parents and grandparents tell me that life was simpler and slower in the past. People trusted each other. Today, it is very difficult to find people whom you can trust.

12. How do people in your community help one another?
People in my community help each other in whatever way they can. Some people help by giving money and some people help by giving their time.

52. Describe an occasion when someone or something made noise.

You should say:

- Who/what made the noise
 - What the noise was like
 - What you did
 - And explain how you felt about it.
- With so many vehicles on the roads noise has become very common in our lives and we have got so used to it that it has started seeming normal.
 - However, here I am going to talk about a time when my neighbours children made a lot of noise.
 - One day, my dog, Mithu, accidentally scared those children, and it led to quite a commotion.
 - It all happened when I was taking Mithu for a walk in our neighbourhood.
 - Max is a friendly and playful dog, but he gets excited when he sees children.
 - Manpreet and Manthan were playing in the street and Mithu could not stop himself and playfully ran towards them.
 - Manpreet got startled and let out a loud scream, expressing his fear.
 - It was a sharp, high-pitched sound that caught the attention of everyone nearby.
 - Max, sensing Manpreet's reaction, immediately stopped and started wagging his tail.
 - Seeing the situation, I rushed over, apologised to Manpreet and tried to calm him down.
 - I explained that Mithu was just being friendly and didn't mean to scare him.
 - Manpreet still a bit shaken, and expressed his fear of dogs.
 - To avoid any more noise and ensure Manpreet felt comfortable, I quickly led Mithu away from him and continued our walk in another direction.
 - I also apologized once more and reassured Manpreet that I would be more cautious in the future.
 - The incident left me feeling a mix of concern and responsibility.
 - I took it as an opportunity to educate Mithu and myself on how to approach people more cautiously during our walks.
 - In the end, the situation was resolved, and Manpreet appreciated the gesture of understanding.
 - I made a commitment to ensure Mithu's exuberance/playfulness didn't cause any more unexpected noise in the neighbourhood.

OR

- Noise pollution has become an inevitable part of our life.
- Whether we like it or not, we have to tolerate it. We can't escape it.
- Here, I'm going to talk about a situation when there was too much noise.
- A religious function, which we call jagrata or jagran, was held last Sunday in my neighborhood.
- In such functions people sing hymns and chants in praise of Gods and Goddesses the whole night long.
- The function started at 8 PM and went up to 5 AM.
- There is a law against using loudspeakers after 10 PM but people don't abide by the law in the name of religion.
- They do not realize that some people might be suffering from excessive noise.
- I was not able to sleep the whole night.

- I closed all windows of my house to reduce that sound, but it did not make any difference.
- Then I put earplugs in my ears but that too did not work.
- There might have been many other people who suffered like I did that night.
- I am not against any religious event, but I'm definitely against using loud speakers after 10 PM.
- Such laws should be implemented more strictly, and I believe that the use of pressure horns also must be restricted.
- Noise pollution has a negative effect on our mental health as well as physical health.
- It can lead to hearing impairment, Fatigue, Heart problems, Insomnia, Anxiety, Depression and so on.
- It can also reduce the work efficiency.
- One of my uncles has come from Canada and he tells me that in Canada people are not using horns unnecessarily and still the traffic runs very smoothly.
- I hope we all realize the menace of noise pollution and do our bit to reduce it from our lives

Part 3 - Follow Up Questions

1. Why do some people like to use photographs to document important things?

I think photographs are one of the best ways to keep past memories alive. Whenever we look at photographs, we cannot help but remember the events and people that happened during that time. Also, photographs are one of the best ways to share our experiences with others. It is rightly said, a picture is worth a thousand words.

2. What can one learn from photographs taken throughout history?

The main thing people can learn from photos is the successes and failures of our ancestors. On the one hand, photographs are a living proof of human ingenuity and progress and on the other hand, they also show how and where we failed. For example, photos of rich forests in the past at places occupied by modern high-rise buildings show our architectural achievement but at the same time show how we sacrificed our environment to achieve the same.

 - The electric kettle is a simple thing.
 - It's like a pot, but it heats up water really quickly with electricity.
 - I use it to make hot water for tea, coffee, or instant noodles.
 - I also use it to make warm water for cleaning or sometimes for a quick hot water bottle when I feel a bit chilly.
 - I use my electric kettle in the morning for a cup of tea to start the day.
 - During the day, I make a few more cups of tea or coffee, especially when I'm studying or working.
 - It's so easy to use - just fill it with water, plug it in, and in a few minutes, you have hot water.
 - The reason I can't live without it is that it makes my daily routine easier.
 - I don't have to wait for water to boil on the stove, and I can make a quick cup of something hot whenever I want.

In today's era of mass-produced goods, there is no connection to products.

9 Is the way people buy things affected? How?

Yes, people today buy things online. Moreover, like I said before we don't have an emotional connection with products as in the past. Earlier, we felt a loss when something broke down. Now, it's just an object, and breaking down is an opportunity to buy a newer version.

10 What do you think influences people to buy new things?

I think it's just that as things get old, people get bored, and to renew their excitement, they buy a new thing. It also the influence of ads, which keep on reminding us that we are missing out if we don't have the latest version of something.

Part 3 Follow Up Questions

1. What kinds of markets are there in India?

I think Indian markets can be classified into three categories. First and the dominant one's are the small shops in the neighbourhoods, followed by street markets and the final would be shopping malls and high street markets.

2. Do you think small markets will disappear in the future?

No I don't think so because India is world's most populated country and also the most diverse. Moreover majority of the population in India still belongs to the lower and middle income group and they mostly prefer to shop from small markets.

3. Have people's shopping habits changed in recent years?

Definitely yes, people are now shopping more than ever, in fact, more than their needs. This is primarily due to two reasons, one is that shopping has become more convenient, for example, people can now shop online. Secondly, I think people now have more options to choose from and the goods have become much more affordable as well due to the rise in income levels.

4. What are the differences between shopping in street markets and big shopping malls?

Pricing and weather are the two biggest factors that come to my minds. It is easier to shop in malls at any time of the year because they are air conditioned whereas people don't prefer street markets during hot summer days or extremely cold days. For pricing, street markets are obviously less costlier.

5. Do you think the goods sold at discount stores do not have good values or qualities?

Yes, I agree with this statement because discounting is one strategy that companies apply when their goods do not sell easily. If a product is real good in quality, people are willing to pay a hefty price for it. For example, people queue in lines to buy new iphones even if there are no discounts offered because they love its quality whereas for discounted phones, people do not value them much.

6. Why do some people like to buy expensive goods?

Like I mentioned earlier, the primary reason is obviously the quality of the product, like in case of apple iphone. Secondly, it could be that people think expensive products as a status symbol.

7. Do you like shopping online or going out for shopping?

I do a mix of both. Sometimes I shop online if I get a good deal. Many sites such as Amazon, Flipkart and Snapdeal, which give discounts

8. What is the difference between shopping with friends and shopping alone?

It's fun to go shopping with friends. You can discuss things and take each other's advice. When I go with my parents, they cannot guide me about the clothes, which are in trend.

9. What are the disadvantages of shopping in a big mall?

In big malls, nobody guides you about any product. You have to use your own judgement. Secondly, you cannot get things on credit, which a small shopkeeper in your town would give you if he knows you. Another disadvantage is that mostly big malls are outside in the suburbs, and so it is only possible to go by your car.

10. Why do people like to buy branded products?

Brands are popular because they provide quality, good after sale service and also provide status.

11. In your opinion are big discounts real or just an advertisement?

Big discounts are real in the case of branded products, but in most cases they are just an eyewash. Sometimes, outdated or defective pieces are sold by giving big discounts.

 - It happened during the last summer.
 - I had just finished my college and all my friends decided to go for a party.
 - One of my cousins from Canada, who is also my best friend was also visiting us during that time.
 - So we decided to go to a newly opened restaurant in our city.
 - We had heard a lot of good reviews about this restaurant from everyone.
 - It was a Chinese restaurant located in the centre of our town.
 - When we reached the restaurant we were told to wait for 1 hour as the restaurant was completely full and there was a waiting period to get inside.
 - So we had to stand in a queue for more than 1 hour to gain entry inside the restaurant.
 - The moment we entered the restaurant we noticed the tables were dirty, so we asked the waiter to clean them.
 - It took them 15 minutes to do the cleaning and then ask us for our order.
 - We ordered quickly as we were very hungry.
 - But despite our repeated requests to hurry up, they took 1 hour to prepare our food.
 - My friend then complained to the manager but his response was very casual.
 - He said we will have to wait as there is huge rush.
 - Finally, our food came and it did not taste good as it was not cooked properly.
 - Again my friend complained to the manager but he was not ready to listen to us.
 - So we paid the bill and left to eat at another restaurant.
 - This was the bad service that we received at a restaurant and it was a horrible experience for all of us.

Part 3 Follow Ups

1. How do companies train their staff to deal with complaints?

I believe that companies train their staff on two fronts. First, they provide the employees knowledge about the product/ services for which they have to handle complaints. Second, they train them on communication skills so that they can handle the complaints for customer in a empathetic manner.

2. What do people usually complain about?

Usually people complain when the product/ service they ordered for does not meet their expectation or has some fault in it. I feel that people have less patience these days and they want everything to be perfect and at the same time affordable as well. When there is a mismatch between expectations and what people receive, it leads to complaints.

Generally speaking, most of the times people do verbal complaints, in an informal manner. This way they are able to express their displeasure immediately. However when the matter is serious people like to lodge formal written complaints.

People are often left disappointed when they receive bad customer service. Sometimes they ignore it by accepting the way things are, but if it really concerns them then they like to complaint about it.

5. How would you react if you received a poor service at a restaurant?

I would simply inform the concerned staff about the problems I faced during the service, so that they take care about it in future. I would not make a big issue or a scene out of it but if the staff doesn't improve their service then I would stop dining at that restaurant.

6. Who are more likely to make complaints, older people or younger people?

Honestly, I think age doesn't play a role here. According to me both the age groups are equally like to make a complaint when they receive a bad service because complaints are made when someone is dissatisfied about the service/ product that they have paid for, and this can happen with person of any age group.

 - Today, I am going to talk about one time when I got delayed because of something unexpected.
 - My parents and I were travelling to Ahmedabad for my cousin's wedding, and it was the middle of the monsoon season.
 - However, we were travelling through Rajasthan, which is one of the drier parts of India.
 - So, we weren't expecting any rain, but nature had other plans for us.
 - It started raining about five hours into the journey and it rained incessantly for hours.
 - We still thought it was ok and it's just rain and it would subside sometime soon.
 - But it didn't.
 - In fact, our train stopped at one station because everything ahead was flooded.
 - A railway official told us that it was one of the worst floods in the state and the railway tracks were submerged under 2-3 inches of water.
 - I vividly remember one scene when we entered a railway office to enquire when the train would leave.
 - All the chairs were floating, and the railway officials were sitting on the top of tables.
 - When we all think about that journey, it is the first scene that comes to mind.
 - Finally, after hours the train moved again.
 - We missed the wedding, but we did attend the reception which was the next day.
 - When I think about it, I don't remember anything about the return journey.
 - The floods did cause inconvenience, but it also made the journey much more memorable.

I think there are two things that government should do. Firstly, they should focus on making the experience of travelling on public transport more convenient and hassle free. Secondly, they should make public transport more affordable so more and more people are encouraged to use it.

 - So, I was very apprehensive at the beginning, but it all changed with time.
 - We were allowed to choose the topic of the project ourselves.
 - So, we chose the topic of global economic crisis during 2007-2008.
 - All of us were very curious about what happened for such a big crisis and moreover why India was not very affected.
 - You can say I was the nerd in the team, so I was given the role of collecting data.
 - However, both the other team members also helped, especially Rajesh
 - I still remember how we spent every afternoon sitting and reading books on the topic in the library.
 - We also read some journals on the topic on the internet.
 - It was during this part that we three became really good friends.
 - I compiled all the information and then all of it into divided different portions and wrote it down.
 - The last part of the project was team presentation.
 - I was really afraid as I found speaking in front of people really daunting, so Rajesh decided to help me practice for it.
 - I think we practiced giving the presentation three four times and that made me much more confident.
 - I think we all did really well in the presentation because only two teams got an A grade in the presentation and we were one of the two.

- Whenever he comes, he stays with us.
- He went for his check up the very next day
- Unfortunately, he was diagnosed with squamous cell carcinoma of the jaw bone.
- He had to receive radiotherapy and chemotherapy and stayed with us for almost 40 days.
- Helping my mother and father to take care of him was more important than anything else, and so I did not have any time for studying or completing my project work.
- After my uncle moved backed to Canada I realised that I only had one week left for submitting my project
- I remember I had to work till late at night and sometimes had to get up very early to finish my project work.
- But I could not do that much justification as I had intended to.
- I got a good lesson that we should not put off doing things unnecessarily for the last minute.
- It is always better to be more organised.
- Future is never predictable and events often go not as planned.
- So, we should value our time and manage it effectively

PART 3 FOLLOW UPS

1. On what occasions do people have to do things in a hurry?

Mostly it's when people are getting late for something they tend to do things in a hurry. For example, I always eat my breakfast in a hurry in the morning because I always get late for my college.

2. Why do some people spend a long time on having a meal?

Well I read somewhere that if we chew our food properly then it is easily digested by our body. I believe this could be one reason why people tend to eat their food slowly.

3. Would people feel more satisfied if they finished doing something quickly?

Definitely yes, because everyone is short on time these days. If they are able to complete a job in less time they would definitely feel happy about it.

4. What kinds of jobs need to be done quickly?

Well, I have never thought about this thing before, but I think professions such as, emergency services, where it's a matter of life and death, people need to respond to the situations as fast as they can. Other than that I can think of fast food business as other example where the job needs to be done quickly.

5. What are some examples of work that needs to be done quickly?

Like I already mentioned, professions which deal with saving someone's life and places which charge a premium for delivering a certain service in a short period of time, they need to be quick at their jobs.

6. What might make some people more productive than others in completing tasks?

I think people who focus on one task at a time are more productive as compared to those who multitask, in fact, this has also been proven in many studies conducted on multitasking. Other than that, people should not procrastinate and just focus on finishing the job.

69. Describe an exciting activity that you experienced with someone else

You should say:

- What the activity was
 - Who you were with
 - When and where it happened
 - Why you went for it
 - And explain how you felt about it
-
- In recent years, adventure sports have gained a lot of popularity and many youngsters are doing them for the thrill and excitement they offer.
 - Even I couldn't avoid their allure and recently went to Rishikesh to do bungee jumping with my best friend Suresh.
 - Actually this year, one of our mutual friends went there with his family.
 - He did bungee jumping and the way he talked about it, we also got motivated to try it.
 - In fact, he talked about it non-stop for a whole month.
 - Ultimately, we decided, we had to do it just to shut him up.
 - Suresh also has a slight fear of heights, so we also thought that it would help him overcome his fear as well.
 - So during this year's summer vacations, Suresh and I went to Rishikesh to try it.
 - There are many other places which offer bungee jumping in India, but Rishikesh is the closest and cheapest option.
 - Coming to my feeling, I think they kept on changing with time.
 - At first I was pretty excited.
 - As the actual date came near, my excitement got mixed with slight nervousness.
 - I was still excited but I was also slightly afraid.
 - Just before jumping, I also contemplated about just cancelling and coming back.
 - But then I saw Suresh doing it and I thought, if he could do it despite his fear of heights, why couldn't I.
 - Thinking that, I just went ahead. Still afraid, but somehow I controlled my fear.
 - However, as soon as I jumped my fear vanished and it was all exhilaration.
 - I felt like I had just done something impossible.
 - The only disappointment was that it lasted for much shorter duration than I had envisioned.

Part 3 Follow Up Questions

1. What kinds of activities do young people like to do?

Young people like to take part in a variety of adventure sports like bungee jumping, river rafting, paragliding and so on. Besides that, they also like to play conventional sports like football, volleyball, cricket etc.

2. Why do some young people like adventurous activities?

The main reason is of course the thrill that these games entail. The risk involved makes these much more exciting. These sports give a different kind of rush that is impossible to achieve in other sports. Moreover, these sports also help push our mental and physical boundaries and overcome our deepest fears.

3. Do you think old people accept changes?

Most elderly don't like change because I think it becomes difficult to adapt to changes as people grow older. In their youth, people have a sharp memory and flexibility which allows them to quickly learn new things and technologies. However, it becomes much harder to do so in the later stages of life.

4. How do exciting activities relieve people's stress?

I think these activities make people forget about their worries and thoughts and bring them back to the present. And ultimately when they put their lives at risk, they feel that their other worries and stresses are much more insignificant in comparison.

5. Can you give some (other) examples of adventurous or risky activities?

There are many adventurous activities that people like skiing, mountain climbing, dirt biking, sorbing and so on. In a way, any activities which put our life at risk are adventurous in my opinion.

6. What skills do people need to take part in adventurous activities?

I think there are only two skills required to take part in adventurous activities, a strong willpower and physical fitness. Physical fitness is a given, but a part of these games is also overcoming our fears and that is only possible through mental fortitude.

70. Describe a successful person who you once studied or worked with

You should say:

- Who this person is
 - When you studied/worked with this person
 - What you did together
 - What this person did to become successful
 - And explain how you felt about studying or working with this person
-
- I am going to describe a friend of mine called Ramesh. Ramesh is a software engineer by profession.
 - He is in his mid 20's, I think.
 - He is tall, he is about my height, with dark hair and a friendly face.
 - He is always smiling and he cheers me up whenever I see him.
 - I first met Ramesh in college, he was my roommate in the hostel in my first year in college.
 - So on the first day when we were moving into the hostel, Ramesh introduced himself to me and we struck up a conversation and got to know each other and then we became good friends.
 - Ramesh as I said is a software engineer and he is really good at that.
 - We studied computer science at university where I met him and since then he has been working in software industry.
 - During college days he helped me a lot in understanding the complex computer languages and algorithms.
 - He is very good at programming and together we worked on an app for queue management at hospitals.
 - Also, because of his programming skills Ramesh was able to secure a job in Google and got a record salary package.
 - When I studied with Ramesh I was always amazed by the hours he would put into studies and this is something that pushed me as well to study hard.
 - He was like a role model to me at that time and because of him I could also secure a good job in a reputed company.
 - I believe his success comes from his work ethic, he is really hard working, he is really persistent.
 - He lives in a different city now but we often catch up with each other on social media and discuss about our good old college days.

Part 3 Follow Up Questions

1. Is money the only measure of success in your country?

No, in my country wealth is not seen as the only criteria to establish success. Although, it is one of the factors and an important one, but not the only one. There are many successful people in my country who do not have a lot of money but are still considered successful because they have achieved tremendous feats in their life or professions.

2. How do you define whether one is a successful person?

First of all, I think the definition of success is subjective and varies from person to person. But still a broader definition of success would be about achieving personal goals and finding fulfilment in one's pursuits.

3. What is the standard of success in your country?

The standard of success in India, like many other countries, is highly diverse and influenced by individual and societal expectations. In my country a person who has achieved good educational qualifications, financial stability and has good family ties is generally considered successful.

4. Is there a contradiction between success and happiness?

I think it depends. Success can contribute to happiness when it aligns with one's personal values and goals, but it may lead to unhappiness if pursued at the expense of one's well-being and contentment. Balancing both is key to a fulfilling life. For example a wealthy person with ill health will not be happy.

5. Is it easy to succeed in the national tests in your country?

Honestly speaking, in my country it is very difficult to clear national tests or competitive exams. Because of the humongous population there is immense competition in such examinations. To give you an example, almost 9 lac students give civil services exam every year and out of them only 1000 make the final cut.

6. What are the factors that influence students grades at school?

I would say there are myriad factors that play a role in students grades. Although, primarily it depends on the efforts/hard work put by students, the guidance from teachers and the support from parents is also very important. Apart from this nowadays

71. Describe a park or a garden in your city

You should say:

- When you often go there
 - Where it is
 - Who you often go there with
 - What it is like
 - And explain why you like to visit it
-
- In today's time parks and gardens are the lungs of cities and towns that have become jungles of concrete.
 - It is a delight to find a green space in the urban areas of today.
 - I live in Chandigarh that has a very well-developed infrastructure and many parks and gardens.
 - In fact it is called 'The City Beautiful', because of its layout and the greenery in it.
 - It was designed in the 1950s by a French architect who understood the value of green spaces in modern living.
 - He provided the city with many parks where the residents can go and relax
 - The part of the city that I live in has three beautiful parks and I love all three of them. But my favourite is a garden by the name of a 'Hibiscus Garden.'
 - It has been landscaped very beautifully with slopes going up and down. A little stream running through the park. A few bridges and different varieties of the hibiscus plants.
 - Besides hibiscus plants, there are many beautiful huge trees that I love to go and sit under and admire nature from.
 - I have often seen people coming to this park on a holiday to have picnics with their children.
 - Young children, love to roll on the gently sloping hillocks, and there are youngsters who love to cycle on the sloping pathways of the park.
 - Whenever I get the time I visit this beautiful place and I usually go alone as I love to soak in its beauty and the peace I get by being there.
 - I am a very passionate photographer and this park has often provided me with some beautiful clicks.
 - For me, this park is my little piece of heaven on earth and being there is meditative for my soul.

- Based and designed in accordance with actual Exam pattern.
- Passages from the book are often repeated in actual exams.
- Tips for different types of reading questions
- Vocabulary for each reading.
- Available on www.makkarielts.com and local bookshops in India

IELTS Reading Tip for True/False/Not Given Questions:

Focus on Keywords and Synonyms: Pay close attention to keywords in the question and the passage. Look for synonyms or paraphrases of the keywords in the text.

Example:

Question: "The passage states that the company achieved record profits last year."

If the passage says: "The corporation attained unprecedented earnings in the previous year."
(This is True because "unprecedented earnings" is a synonym for "record profits.")

If the passage says: "The company had a challenging financial year."
(This is False because it doesn't confirm the statement about record profits.)

If the passage says: "The financial report does not mention last year's performance."
(This is Not Given because there is no information to confirm or deny the statement.)

By identifying synonyms and key terms, you can better determine whether the information in the passage supports the given statement.

72. Describe a beautiful city

You should say:

- Where the city is
- How you knew the city
- What buildings the city has
- What it is famous for
- And explain why you think this city is beautiful

- India is a diverse country.
- There are many beautiful cities in India.
- Some are beautiful because of their historical buildings, whereas others are beautiful because of their modern architecture. Some cities are beautiful because they are in the mountains and valleys, whereas some are beautiful, because of the warmth of the people.
- Here, I would like to talk about Chandigarh, which is also known as 'The City Beautiful'
- It was designed by the French architect Le Corbusier.
- It is the first planned city of India after her Independence.
- Chandigarh is the cleanest and the happiest city of India according to two different surveys held in 2010 and 2015.
- It is also the first smoke-free city in the country.
- It is a union territory and is also the capital of two states - Punjab and Haryana.
- The Rock Garden in Chandigarh is a masterpiece out of waste material.
- Sukhna lake, is the biggest man-made lake. It is a beautiful place for the people to enjoy with their families.
- The sector 17 market is a shopper's paradise.
- The Rose Garden is Asia's largest garden. And has innumerable variety of rose plants.
- The city has 47 sectors.
- Each sector has residential and commercial zones
- The roads are designed and oriented in such a way that most time of the day, they are under shade.
- There are huge parking areas in the commercial zones so that the parking of vehicles doesn't create a havoc on the main roads.
- The Parking lanes are as broad as the main roads.
- So, you see, while the city was planned in 1952, it is still the most well planned and beautiful city of India.

Part 3 Follow Up Questions

1. What are the differences between modern towns and modern cities?

Modern towns and modern cities are not much different. All facilities are now available at both places. However, there are 2 major differences. First difference is that cities have more density of population. Secondly, life is a bit slower in modern towns than in cities.

2. How can people preserve historical buildings?

There is so much people can do in this respect. I believe that the role of people is to visit them more often with friends and family, so that the government can have funds to maintain these buildings. Secondly, people should refrain from littering these places and writing on the walls. And finally, they should not indulge in vandalism.

3. Why do some people like to visit historical places?

People go to historical cities to learn/gain knowledge about the past, the way of life of the people in the past, their culture, their roots, and the architecture.

4. Why do people go to modern cities?

People visit modern cities for various purposes. Some go for work/business reasons, and some for tourism. Those who travel for pleasure to modern cities do so to experience a life, where modern technology is incorporated in every aspect of life and to learn and see how people there are using technology in their daily lives. Singapore is a very good example of such a city, where we can not only experience the modern way of life, but also see how they have used modernization to help preserve and enrich the environment.

5. What are the problems caused in maintaining historical cities?

The problems that maintenance of historical cities can cause are related to the funds required for the restoration and upkeep of the city. Another issue could be the pressure on the resources of that city because of tourism. Besides these buildings they take up too much space which may otherwise be used for other purposes.

6. Do you think having too many tourists is a positive thing for historical attractions?

No, I don't think so. I believe that too many tourists will lead to pollution and also will affect the upkeep of the historical sites. Such sites need a lot of care and maintenance and limiting the number of visitors to such sites can help maintain them, prevent damage to such sites, and also sustain tourism.

7. What can we do to stop visitors from damaging historical places?

To prevent the damage to historical places by the visitors many measures can be taken. There should be strict punishments, like high fines for the people who try to cause harm. There should be security personnel employed to ensure that no one tries to damage the historical places and along with that there should be security cameras installed to monitor the activities of the tourists. There can be tourist guides appointed, who also can ensure that no one causes any damage.

8. Do you think too many tourists is a positive thing for historical attractions?

In my opinion having too many tourists has both advantages and disadvantages.

It ensures that our history and culture is passed to the future generation

It brings revenue and business for the people of the city where the historical attraction is.

Disadvantage: Too many tourists can cause damage to the historical attractions.

73. Describe a difficult task that you completed at work/study that you felt proud of

You should say:

- What the task was
 - How you completed it
 - Why the task was difficult
 - Why you were proud of the completion of the task
-
- I think life would be pointless and boring without difficult tasks.
 - Achieving difficult tasks gives us a feeling of fulfilment, which is one of the best feelings in the world.
 - Today, I would like to talk about one such task, which I never believed I could do.
 - It was winning a public speaking competition.
 - It was difficult because I had a huge fear of public speaking in my childhood.
 - I came to know about my fear when my teacher asked me to read the news in front of the class in 4th standard.
 - I choked on the stage and I couldn't speak for more than 10 seconds.
 - Many of my classmates laughed at me and this increased my fear even further.
 - I avoided speaking in front of my class for a long time.
 - Whenever, it was my turn to read the news in front of the class, I used to pretend to be sick and take a leave from school.
 - However, I knew I had to get over this fear because public speaking is a really necessary skill.
 - It was my mother who pushed me and made me get over the fear.
 - She made me enroll in a speech competition in 8th standard.
 - Firstly, she made me practice in front of her.
 - I was able to speak in front of her without any problems.
 - Then, she invited some of her friends and she made me speak in front of them.
 - At first, I hesitated but gradually I became comfortable.
 - My mother's friends were really encouraging and they motivated me whenever I hesitated.
 - I used to practice everyday for 1 hour in the evening.
 - This practice made me more and more confident.
 - I don't know why but on the day of the competition I was really confident.
 - I spoke like I used to in front of my mother's friends.
 - I felt like nothing was different.
 - I was really happy that I didn't hesitate and spoke fluently without any issue.
 - The icing on the cake was that, finally, when the results were announced, I had stood first.
 - It was surreal moment.
 - It made me really proud of myself and it instilled the belief in me that everything is possible if I worked hard.

Part 3 Follow Up Questions

1. What are the things that make people feel proud?

I think it depends upon their age. In our childhood or youth, completing difficult or challenging tasks definitely makes us proud. For example, achieving a top rank in a competition, securing admission in a good top ranked university or winning a sports match. However, as people grow older, it is more about their children's achievements and they feel proud when their children achieve things in life.

2. Do people often feel proud of themselves when they complete a difficult task?

Of course, yes. I think human beings thrive on a sense of achievement. We feel proud when we complete difficult tasks because we know that many others wouldn't have been able to do them. Also, completing difficult tasks means that our efforts did not go waste and seeing our efforts bear fruits is one of the happiest feelings in the world.

3. What challenges do young people face today?

Young people face many challenges today but the biggest is certainly competition. Today, working hard is not enough and many fail despite working hard because of the increasing competition. The second challenge is inflation and high prices, which means affording things is challenging. Finally, today the youth have more responsibilities. Due to increased life expectancy, they not only have to take care of their children, but also their parents and grandparents. This means they have little time for relaxation or hobbies.

4. How do young people handle difficult or challenging tasks?

I think the internet has made life a lot easier in this regard. There is ample information available on websites like Google and Youtube on how to deal with problems. Moreover, young people also take advice from their parents and grandparents, while dealing with problems.

5. What kinds of rewards do people receive from work?

It depends upon the company. Firstly, in some companies there are performance-based bonuses and incentives, which people get if they achieve the set target. Secondly, people get motivation in the form of employer appreciation or awards like employee of the month, which are hung on the wall for all to see.

6. What are the most difficult jobs that people do?

There are many difficult jobs but I think the most difficult job is working in the armed forces, the army, the navy or the airforce because they have the greatest risk to life. Another job that I think is difficult is that of being a doctor or nurse as even small mistake can cost the life of others.

74. Describe a time that something changed your life in good ways

You should say:

- When and where it happened
- What happened
- How you felt about it
- And explain how it changed your life in good ways

- Change is the law of nature.
- Knowingly or unknowingly many things bring a change in our life.
- Here I would like to talk about a time when my life changed for the better.
- It was about two years ago.
- My cousin Jasleen visited us from Canada.
- She had gone to Canada for her higher education.
- The Jasleen I knew was a size XXL.
- But the Jasleen in front of me after 2 years was a size XS
- She was unrecognizable.
- She was also a lot more confident and smarter.
- She was with us for 2 days only, but those 2 days with her changed me a lot.
- Even I was on the borderline obese side, but nothing had worked for me till that time for losing weight.
- I asked Jasleen about her journey from extra big to extra small.
- She told me that it had not been easy for her, but she had made up her mind to lose weight gradually and in a sustainable way.
- She made it a point to walk to her college, which was just a mile.
- All her friends took the bus, but she walked.
- Surprisingly they reached the college in almost the same time. They had to wait 5-10 minutes for the bus, but she reached the college in 14 minutes with her brisk walk.
- In the evening she would again go to the library of the college.
- So these 4 miles every day helped her.
- Another thing she did was add a lot of fruit to her diet.
- She stopped sugar altogether.
- Just these 2 things and in two years she was a new person.
- Since then I have started walking whenever and wherever possible.
- My teas are without sugar and when I am hungry between meals, I go for fruit.
- It has not only improved my looks, but I also feel healthier and more confident.
- All my clothes look good on me and I don't feel conscious of my body any more.

Part 3 Follow Up Questions

1. Is your country changing rapidly?

Yes, my country is changing rapidly. India is a developing country and is changing day-by-day for the better. With the advancement of technology it is stepping fast from a developing to a developed country. Change has always been happening, but technology has hastened the process of change.

2. What can smart phones do these days?

Smartphones are smart phones. They are mini computers that fit in our pockets. They do everything, which was earlier possible only on computers. They have risen above the basic purpose of phones that is communication. They provide information, entertainment, as well as connectivity.

3. Since most people do work on their computers, why do they still need to go to the office?

They still need to go to the office because there are still many jobs, which require face-to-face interaction. Furthermore, doing all the work from home through a computer can be very boring, as the office atmosphere is missing. Internet connectivity is still a problem in many places.

4. Do you think people's work in the future will be heavily affected by technology?

Yes, people's work will be heavily affected by technology. Those who will use technology can develop a wider network of customers or clients and will consequently do better at work.

5. Compare the pace of technological progress in the past and in the present?

Technological progress was much slower in the past as compared to the present. For example, when there was any new invention in the past, it took time to reach the people, but today the information of any new thing in the market can be made to reach the people instantaneously, because of the Internet.

IELTS Speaking Tip:

Explanation: Provide details, explanations, or examples to support your point. This is where you elaborate on your answer and provide specific information.

Example: Offer concrete examples or personal experiences to illustrate your explanation. Real-life examples make your response more relatable and convincing.

Link: Conclude your response by linking back to the question or summarizing your main point. This helps your answer feel cohesive and complete.

Example (Question: "Do you prefer to travel alone or with a group?"):

Point: "I generally prefer traveling with a group of friends or family."

Explanation: "Traveling with others allows for shared experiences and helps with planning and decision-making during the trip. It also adds a sense of security, especially when visiting unfamiliar places."

Example: "For instance, on a recent trip to Thailand, I traveled with a group of close friends. We were able to divide the responsibilities, such as choosing where to eat or deciding on activities, which made the trip more enjoyable. Plus, we created lasting memories together."

Link: "So, in summary, while I appreciate solo travel for its independence, I find that traveling with a group enhances the overall experience and creates wonderful bonding moments."

By using the PEEL method, you can structure your responses in a way that demonstrates your ability to communicate clearly, provide supporting details, and engage the examiner during the IELTS speaking test.

Part 3 Follow Up Questions

1. Are there any differences in the relationship between you and your friends and between you and other people?

Of course, I am much more honest and direct with my friends. I know my friends well and I know their limits and what is tolerable to them. On the other hand, with strangers I am always afraid of saying or doing something that might hurt their feelings. So, I am much more reserved and sometimes I hide my true feelings in front of others.

2. Do people feel lonely in crowded cities?

Yes surprisingly although we are geographically surrounded by people in cities, emotionally we are much farther apart. Because of the busy lifestyle, people don't find time to interact and form close bonds with their neighbours and friends. Thus, more and more people are facing problems of depression and loneliness in cities.

3. Where and how can people get to know new people?

I think one of the best places to meet new people is celebrations like weddings, anniversaries and birthday parties. People can also meet strangers while travelling or visiting new places. I think getting to know people is all about spending time with them. For example, while travelling I used to play games with the fellow travellers and this way I learnt a lot about them.

4. Can clothing tell and reveal a person's personality?

Yes, I think appearance and clothing preferences can give a pretty good idea of a person's personality. For example, a person who wears informal clothes like T-shirts and Jeans is much more likely to be carefree and casual. Similarly, people who usually dress formally in public, are more disciplined.

5. Why do individuals from the same family have different personalities?

I think personality is influenced not only by upbringing but many other external factors like media, teachers and friends. Also, gender influences behaviour as most families treat boys and girls differently.

6. How does society influence a person's personality?

We are social animals. It is our basic tendency to conform to the standards set by the society. If people don't adhere to the morals and ethics laid out by the society, they are afraid of being left out and being a social outcast. So, in a way, people try to match their behaviour with what's considered normal and fit into the world around them.

76. Describe a foreigner who speaks your native language (hindi) very well

You should say:

 - Where he/she is from
 - How he/she learns Hindi
 - And explain why he can speak Hindi well
-
- I don't know many foreigners as I live in a small village and I have never visited another country.
 - However, recently I came to know about a foreigner on the internet.
 - Nowadays, many people post their travel videos on Youtube.
 - I also love travelling, so I watch these channels sometimes.
 - One of these channels is of a foreigner, Chris Steven.
 - His channel grabbed my attention, as he converses in fluent Hindi.
 - He is an American and was born and brought up in America.
 - However, the way he speaks Hindi, it seems like he was raised in India.
 - He visits India often, because he is very interested in Indian culture.
 - As I watched his channel more and more, I came to know how he developed an interest in Indian culture and Hindi.
 - One of his neighbours during his childhood years was Indian and he introduced Chris to Bollywood movies.
 - That's how it all started for him.
 - Initially, his neighbour used to translate and help him understand the movies.
 - However, slowly he started watching these movies on his own.
 - He picked up a little bit of Hindi by watching these movies
 - His love for Bollywood also made him more curious about Indian culture.
 - Eventually, he learnt Hindi, by taking it as an optional course during College.
 - And his visits to India, polished his Hindi even more.
 - I know many of us Indians love to learn about Western culture.
 - So, its always nice to see a foreigner wanting to learn about Indian culture for a change.

1. What foreign languages do Indian children learn?

Indian children have many options nowadays. The most common is certainly English. Besides English, children also learn foreign languages like German, French, Urdu and Spanish.

2. Why do Indian children learn English?

There are many reasons. Firstly, it provides more opportunities than any other language in terms of foreign education and job opportunities. Also, it is easier to find English teachers as compared to teachers for German, French or Spanish. Finally and most importantly, it is the main medium of teaching in colleges and universities so it is a compulsion to learn English.

3. Why are so many people learning English?

For most people, I think it is about job opportunities. Today, there are many multinational companies in India and learning English is a must to get jobs in these companies.

4. How can you help children learn English?

I don't know. I don't think my English is good enough to help others. As you can see, I still make some mistakes. However, I can recommend some books like Wren & Martin and Youtube Channels, which can help one to become better in English.

5. Do you think the way people learn English today is the same as in the past?

I think some of the ways are the same. I learnt English as a child in my school and many children still learn it at school. However, today there are also more opportunities. For example, there are YouTube Channels which were not available in the past. Moreover, today, there are many streaming sites, which offer an opportunity to learn English while enjoying TV shows and movies.

6. What are the benefits of the Internet for people's learning?

I think it provides more opportunities for learning. Earlier, people were dependent upon teachers for learning. Now, they can learn on their own as well. Moreover, a lot of content on the internet is free. So, internet has made language learning a lot more affordable.

Part 3 Follow Up Questions

Children typically start to have their own opinions as they grow and gain more exposure to the world around them. This usually begins during their early teenage years when they become more independent and curious about different aspects of life.

2. Are children's opinions influenced by their parents?

Children's opinions are undoubtedly influenced by their parents to some extent. Parents play a significant role in shaping their children's values, beliefs, and perspectives. However, as children grow older, they start to form their own opinions influenced by their experiences and interactions beyond the family.

3. Who are smart children likely to be influenced by?

Smart children are likely to be influenced by a variety of individuals. Besides their parents, they may be influenced by teachers, peers, mentors, or even public figures. The extent of influence can vary depending on the child's interests and experiences.

4. How do inventors or philosophers come up with new ideas?

Inventors and philosophers come up with new ideas through a combination of factors. These may include their natural curiosity, extensive knowledge of their field, critical thinking, and the ability to make connections between seemingly unrelated concepts. Creativity often plays a crucial role in this process.

5. Are there only old ideas from books or previous writers?

While inventors and philosophers may draw inspiration from previous ideas, they also generate new and original concepts. They build upon existing knowledge but often take it in entirely different directions, leading to innovations that go beyond what has been documented in books or by previous writers.

6. What kind of people have lots of great ideas in your country?

In my country, people who work in the fields of technology and entrepreneurship often have many great ideas. With the growing startup culture, individuals in these sectors are encouraged to think

www.youtube.com/makkarielts www.instagram.com/makkarielts www.makkarielts.com/books

Kiran Makkar

English for Exams

innovatively and come up with solutions to various problems. Additionally, artists, writers, and educators are also known for their creativity and the generation of new ideas.

7. When do children begin to have their own ideas?

It is an interesting question. I think children begin to have their own ideas at a very young age. Even very small children talk and amaze us as to where they got those ideas from.

8. Why are there more and more differences between children and their parents?

There are more and more differences between children and their parents because their thinking is different. This is precisely what we call as the generation gap. Parents have their own ideas of right and wrong, but children question everything and want to know why there are some things they shouldn't do. Children don't have the experience which comes with age, but they don't want to accept everything their parents say because they can't see the negative side of it. Parents sometimes lack the patience to explain things nicely and in a friendly way to their children. So, there is a conflict between parents and children.

9. What are the advantages and disadvantages of setting rules for children?

The advantages are that children become well behaved, responsible and productive adults. They also don't land into any trouble. For example, if parents set the rule that children should watch TV or play computer games for limited time, then they don't get addicted to these things and have time for their homework and outdoor games. My father doesn't allow us to be out of the house after 7 pm. We follow that rule because we realize that it is for our safety.

10. Is there someone with good ideas that has changed many people's lives?

Yes, there are many people with good ideas that have changed many people's lives. For example, all great scientists who have invented things have changed the lives of people. The inventors of cell phones have changed people's lives. The inventors of the automobile have changed people's lives. In our village, there was a problem of too much underground water because of which there was a seepage of water in the houses. One of my neighbours planted about 150 eucalyptus trees around those houses. Eucalyptus is known to suck out underground water. Now, the trees are fully grown; they look beautiful and there is no problem of seepage of water in the houses. So, that one person's idea has changed the life of many people.

give bonuses to them.

- Last year they took them all to Agra.
- Param tells me that his mother looks after the needs of the workers' families from time to time.
- They make them feel part of their family and that is why they have never faced shortage of labour.
- Param tells me that if any worker is absent or not well, his father takes his place and does not let the work suffer.
- They also give a lot of emphasis on quality and that is why their products are in great demand in Germany and France.
- Although Param's family is very rich, they are very humble and magnanimous.

- So, this is the successful family business that I know of.

- I found all the aspects of science interesting, like physics, biology and chemistry, as these sciences answer everyday questions about why things happen and how we evolved.
- Today I will be talking about a science, which I find the most interesting.
- It is computer science.
- I remember that I started becoming interested in it when we started with the computer science lessons in the 6th standard.
- We had a wonderful teacher who taught us this subject in a very interesting way.
- Her name was Ms. Meenakshi.
- We used to have both theory and practical lessons for this subject.
- We used to look forward to the lab sessions as we got to work on the computers at that time and try out several things we had learned in class.

- The lab sessions were always enjoyable, but our teacher taught it in a very interesting way and we all enjoyed the theory lessons a lot too.
- There are many interesting things that I have learned from this science.
- The first thing is how we can use computers not just as a source of entertainment, but its use is much more vast than that.
- It can be used to organize and plan things at home. It can be used for many other day-to-day activities like, banking, research work, shopping, connecting with friends and relatives and so on.
- Not only that, it helps the artists create new art and helps designers create clothes, cars, buildings, etc.
- Another reason that I have an interest in this science is because I know that in every field today we need to use computers.
- It will help me with my higher studies and also in my career later.
- In this contemporary world, the computer science has become an important science and it is essential that everyone is computer savvy to be able to do well in their studies or work or even if it is used as a source of entertainment.

Part 3 Follow Up Questions

1. Why do some children not like learning science at school?

There are many reasons why some children don't like learning science at school. The first reason is that learning science requires a strong background in other subjects like math and reading comprehension. So, for example if students face problems in math, they wouldn't be able to master science as well. Secondly, science also requires students to remember a lot of theories and formulas.

2. Is it important to study science at school?

Yes, science is really important to learn at school. Science tells students how the world around them works and functions. Moreover, science promotes rational and logical thinking, which is really important in making us a calm and objective person.

3. Which science subject is the most important for children to learn?

I think it depends upon the children. Personally, I hated physics because it involved a lot of 3D-imagination and I was really bad at it. Some of my friends were bad at memorising formulas and so they didn't like Chemistry.

4. Should people continue to study science after graduating from school?

If they have an interest in science, they should certainly study about it. It can tell them about the new inventions happening in the world. This can open up new business ideas and opportunities for them. However, if they don't have an interest in science, I don't think they should force themselves to read about it.

5. How do you get to know about scientific news?

I think there are some newspapers which publish the latest scientific news. For example, The Hindu newspaper. Another way could be to subscribe to scientific journals.

6. Should scientists explain the research process to the public?

No, I don't think explaining the research process would be beneficial. In fact, I feel it would make scientific inventions even more boring. I think the research process should be shared with other scientists, but there is no use of sharing it with ordinary human beings.

7. What's the best invention in the past hundred years?

I think there are many inventions which have transformed our lives, but I think invention of internet has had the maximum impact. Today, we have endless information available at our fingertips and we can communicate with anyone sitting anywhere.

8. What's the influence of science on human life?

I think there are two main influences of science. First, science brings logic and reasoning in human life. It reduces the impact of superstition and makes us more open-minded and accepting of others. Second, science and inventions have made our life much more comfortable as compared to the past.

9. What can individuals do for scientific research?

I think most science inventions happen accidentally. Individuals see a need and they come up with an idea to address that need. That is how, new inventions take place. Individuals can also donate money to scientific organisation to fund scientific research.

10. What influence can international cooperation in science bring about?

There main challenges to scientific research in today's time is the lack of funding and lack of access to information. International cooperation can address both of them. If countries share funds and their knowledge, scientific research would definitely receive a boost.

80. Describe a person you would like to study or work with

- Who is that person?
 - Why would you like to study with him/her?
 - What will you study?
-
- I normally study alone as I find it hard to study with someone else.
 - However, there are times when I don't feel like studying and it helps if someone can motivate me.
 - Moreover, there are subjects like history, which I find really boring to study alone.
 - In these cases, I do prefer studying with someone else.
 - I had a classmate, Yash in 10th standard and many of my friends told me that he was a very good study partner.
 - So if I do get a chance, I would like to study with him.
 - He has many unique qualities.
 - First, he has a very good grasping power, so he was always able to understand things really quickly.
 - He is also very patient. I have heard from friends that he can sit and explain things for hours.
 - One of my major problems in studying has been my inability to memorise facts and figures and he is very good with mnemonics, which I feel like can be really helpful for me.
 - I remember in school days, he made a mnemonic for the first twenty elements of the periodic table and it became so popular in the school.
 - Everyone used it and that's why perhaps my entire class found chemistry very easy.
 - That's one more reason I would like to study with him. He is willing to share his knowledge.
 - I have heard him saying many things in class that the best way to increase one's knowledge is to share knowledge.
 - At the moment he is doing masters in economics in Canada.
 - He is at the same college I am interested in attending.
 - Hopefully, I would get a chance to meet him there and study something together.

Part 3 Follow Up Questions

1. What kind of people do you like to study or work with?
I like to study or work with people who are intelligent, cooperative and helpful. Moreover, I don't like procrastination, so I avoid working with people who don't follow deadlines.
2. Do you think managers can be friends with their subordinates?
Yes, they can. But the subordinates must realise that such a friendship can be affected if they become complacent at their work well because of their friendship.
3. Which one is more important for you at work, development in work related skills or the recognitions from your supervisor?
Both are equally important for me. Development in work skills is very essential to progress and get promotions at work. Recognition from supervisors gives me the impetus to work even harder.
4. Should children be allowed to choose whom they want to sit with or should it be decided by the teacher? Should children be allowed to choose their classmates?
In the primary classes, it should be decided by the teachers, because the teacher will know better which students could be more helpful for each other if made to sit together. In senior classes, children can figure out for themselves about whom to sit with.
5. Should children be involved in management activities of the school?
I believe that they should be. They feel important and they learn confidence. They can voice out their problems and help the school authorities find answers for them.
6. How should one behave in office to get along well with others?
One should behave nicely. One should be polite to others and cooperate with them. One should not do leg-pulling of other colleagues.
7. Is it important for children in school to get along well with others?
Yes, it is very important for children to get along well with others. If children learn how to get along with their peers at school, they will learn how to get along with others in life when they are older.
8. What kind of people are popular at work?
I think people who stay calm and deal with issues without getting themselves or stressing others are popular. For example, people who are able to employ humour during high pressure situations to lighten the mood. At the same time, people need to be competent, because otherwise feel that they have work extra to fulfil their responsibilities.

 - He is the first one to get married among my friends, and we were all very excited.
 - Indian wedding ceremonies are very lavish, and usually there are 2-3 functions before the ceremony.
 - A day before the wedding, there had been a sangeet ceremony where we danced and partied till late night.
 - I was tired in the morning but woke up and got ready on time to be with my friend on his special day.
 - The wedding ceremony was in the Gurudwara on the outskirts of our city, about 15kms from my home.
 - I had been there before with Ajay, and he had given me directions that time.
 - I am bad with remembering directions and road names. I always rely on my cell phone's map app.
 - On the wedding day I put the address in my phone and started from my home well on time.
 - After 40 minutes, my mobile gps said that I had arrived at your destination but when I looked around there was no Gurudwara and just some old buildings there.
 - I realized that since the Gurudwara was new and away from the city, the map app had not recognized the address and taken me to a different address.
 - I got out and asked around. Fortunately, someone knew the exact location and told me the directions.
 - I had taken the wrong route and driven the opposite way.
 - I was so annoyed with myself for not paying attention.
 - I called another friend who was at the wedding and asked him to share his location in case I got lost again.
 - By the time I reached, the ceremony had already started, and about was half done.
 - I felt terrible about being late to my friend's wedding. Till this day he teases me that I, who is always punctual, was late to his wedding.

Part 3 Follow Up Questions

1. Are you ever late for anything?/ Are you a punctual person?

No, I am a very punctual person. I value time and am never late for anything, unless it is due to some unavoidable and unforeseen circumstances.

2. What excuses do you use when you are late?

I am usually not late for any meetings or appointments. However, if at all I am getting late due to an unavoidable circumstance, then I inform the person I am meeting, beforehand. I don't make excuses.

3. Why are people often late for appointments or meeting?

I think it's a problem with time management. For example, people often underestimate the time they need for something and they realise they need much more time when they start doing it. Moreover, many people don't consider being a little late to be wrong.

4. Do you think people are born with time management skills or they can be taught?

I think time management is something we acquire over time. It's something we learn from our parents. If parents are punctual and strict on time, children also become punctual. Moreover, it also has a cultural aspect. For example, Japanese people are generally very punctual.

5. How would you teach your children time management?

Time management can be taught to children by helping them make a timetable and ensuring that they follow it. Also, children can learn easily from stories or movies, which teach them a lesson about the importance of time and managing it well. The parents are role models for children and they should set a good example for their children.

6. Do old people and young people manage time in a similar way?

No, old and young people do not manage their time the same way. Old people have more life experience and they understand the importance of time management better than the young generation. The young people may be too impulsive or impatient and may not understand the importance of planning ahead. Another difference is the way the younger generation manages time. They make more use of technology and the old people may use the traditional methods, like a timetable or writing down a list of tasks.

82. Describe an advertisement that you don't like

- When did you see it?
 - What is it about?
 - Where you saw it/how you came to know about it?
 - Why you didn't like it
-
- Well, I generally don't like to watch a lot of advertisements because I think they are a waste of time.
 - Although some ads are funny and informative but then there are some ads which can really annoy or irritate people.
 - And today, I would like to talk about one such advertisement which I really dislike whenever it's on air.
 - It is the ad of a toilet cleaner and it's run time is about 45 seconds
 - What happens in this advertisement is that a TV show host visits four to five different households and asks the house owners about the cleanliness level of their toilets.
 - Most of the people say that their toilets are clean but then he insists on seeing them.
 - Next, the camera zooms on to the actual toilet seats, which are very dirty and have yellow/dark brown stains on them.
 - The host then recommends the blue coloured toilet cleaner and applies it to the dirty toilet seats
 - After this the toilets are shown as sparkling clean just like a brand new toilet.
 - Now there are two main reasons why I hate this advertisement.
 - First is obviously the dirty toilets seats being shown on television.
 - I think it would give nausea to anyone watching it.
 - The second, and the worst part about this ad is its timing.
 - Normally, I watch the television while having my food i.e. during Lunch or Dinner and this is the time when they show this ad repeatedly.
 - It makes me feel so disgusted, and I am not able to eat my food after watching this ad.
 - Nowadays this ad is being shown on youtube as well and I always do skip ad whenever it comes online.
 - I wish there should be a method that should allow the viewers to choose the type of ads they would like to see.

Part 3 Follow Up Questions

1. Why do some people hate advertisements?

People do not like advertisements while they are watching a program because ads break the continuity. Another annoying factor is that most of the ads are very repetitive and there is nothing new. But the fact remains that if there are no advertising agencies to sponsor the programs we will not be able to watch good programs .

2. Do people usually buy stuff after watching advertisements?

Yes definitely many people buy the products after they watch an ad. Many of the advertisements are very innovative as well as informative these these days. An advert can lure a wide range of people, from small children to the senior citizens.

3. Is music useful in advertising?

Yes, music adds life to the ad. Music can add meaning to anything and so music is useful in ads. For example, some jingles keep ringing in your ears even after the ad is over. So, the purpose of ad is fulfilled.

4. What are advantages of TV advertisements? How about internet advertisements?

TV ads have both audio and video component. So these give visual reminders of the products and that is what sells the products. Internet adds can be skipped and it is optional and upto the user whether to view them or not.

5. Where usually do we see adverts?

We see ads all around us – on TV, on radio, on roadsides, in newspapers, in magazines, on the internet, on phones and as flyers.

6. Are there any advertisements at school?

Sometimes, supermarkets and fast food outlets give money to schools and open their outlets in schools. This is a way of advertising their products.

7. Are there some inappropriate adverts, like that of a condom?

There are some inappropriate ads, like the ad of some perfumes, which imply that if a boy wears that perfume, girls will flock around him, and the ads of some drinks like coke and pepsi. The ad of condoms is not inappropriate in my opinion. It is an important step in sex education.

8. Why does the government allow such ads?

Government allows such ads, because these ads spend a lot, which boosts the economy. Not only does the government earn, the people working in these ads also earn a lot.

9. Do you think it is bad for children?

Yes, sometimes children are lured to buy such things, but I feel that parents can play a very positive role by keeping an eye on their children and guiding them what is right or wrong.

10. Do parents complain about it?

Yes, parents complain about it at times, but the advantages these ads are giving to the country, are much more than the negative effects of these ads.

11. What are the most advertised products in your country?

Most advertised products in my country are skin, makeup, and hair care products, and food products like carbonated drinks, chocolates, flour, rice, etc. I also see a lot of ads for cars and mobile phones.

12. Which one is often more effective, newspaper advertising or online advertising?

Online advertisements are more effective as they allow businesses to find and reach people interested in their products. With newspaper ads, you won't know who has seen them, but online ads are trackable; thus, companies can focus on customers who have clicked their ads. Also, in this digital world, people mostly go online to read news, and the circulation of newspapers has fallen. So ads in newspapers are not even seen by many.

13. What are the benefits of Advertisements?

Advertisements provide information on new products. They help create jobs by increasing demand for products and services. Some food ads help people make healthy choices and live a better life. Ads bring about many positive social changes like curbs on female feticide, equal rights for women, and reduction of child labor.

14. What do you think of celebrity endorsements in advertising?

I think it's not good as many celebrities ignore the public interest while endorsing the latest fashions and products. For example, many celebrities promote sugary drinks or fast foods, even though they themselves do not consume them.

Also, celebrities are often portrayed drinking or smoking in advertisements, TV shows, and movies. This normalizes and glamorizes behavior like smoking, binge drinking, and illicit drug use, making youth feel that it is appropriate to do the same.

15. Does advertising encourage us to buy things we don't need?

Yes, advertising encourages people to buy things they don't need. The repetitive ads make them believe that a product is better than another product or something that they already own. Consumers buy these tempting products without insight into what they need or can even afford to buy. I bought a coffee espresso machine after seeing an Instagram ad for it, and I have used it two times this month.

16. What role does social media play in advertising?

Social media ads are very effective as businesses can reach many people from different parts of the world within seconds of posting an ad. It also helps them engage with their customers in real time, get their feedback, and build loyalty. Companies also use social media influencers to expand the reach of their brand on social media.

83. Describe a person who inspired you to do something interesting.

You should say:

- Who is this person
 - What they inspired you to do
 - How they inspired you
 - How you feel
-
- A person who inspired me to do something interesting is my cousin's wife, Priya.
 - My cousin got married a few years ago, and he and Priya moved to Ludhiana, about 40 minutes from my hometown.
 - Priya is a computer engineer by profession and works at a software company.
 - Once while I was visiting them, she mentioned that she had started to learn Indian classical dance.
 - I knew she was a good dancer as I had seen her dance at her wedding and other family functions before.
 - But Indian classical dance is complex and takes a lot of training.
 - She said she was driving home one day from work and saw the advertisement for a new classical dance academy close to her office.
 - She knew it was her chance to learn something new.
 - It was also convenient as it was on her route, so she won't waste time commuting.
 - She said she had been going to Bharatnatyam classes for almost six months.
 - She was one of the top students in her batch, and the academy even hired her to start teaching children on weekends
 - She was so passionate about it and talked about opening her own dancing studio one day.
 - I was truly inspired to see that she managed to keep up with it, along with a full-time job.
 - I shared with her my interest in music and how I have always wanted to learn to play guitar.
 - Growing up, I was busy with studies and never got the time.
 - And now that I am older, I feel it was too late to learn.
 - She told me age is just a number and learning anything new needs consistent practice. If she can learn a new skill at her age, so can I.
 - I was so inspired after meeting her. I got myself a guitar and bought a couple of guitar books.
 - I looked up YouTube videos to learn the basics.
 - There were so many resources online for learning guitar and even teachers who taught through zoom.
 - After a few months of learning the basics, I found a guitar teacher near my home who could teach me in person.
 - He helped me work with more complex music, and I was able to refine my skills.
 - I was amazed by my progress and eventually started playing for family and friends.
 - Now, it's a hobby that I really enjoy. It not only relaxes me but is a good escape from the stress of everyday life
 - I will be thankful to Priya for inspiring me to pursue my passion.

Part 3 Follow Up Questions

1. Who motivates children the most?

I think at an early age, parents and teachers motivate children the most. They are role models, and children naturally look up to them. Once they are older, children start idolizing movie and sport stars, and they can motivate children too.

2. How can teachers motivate children?

Teachers can motivate children by encouraging them, recognizing their efforts, setting achievable goals, and allowing them to explore their curiosity and think outside the box.

3. How is it different from teaching kids?

Students who are not motivated will not learn effectively and teaching alone won't improve academic performance. Motivated students are more excited to participate in class, and unmotivated students can disrupt the whole class.

4. What should teenagers have?

Teenagers want to be accepted and valued by their friends, which can sometimes lead them to risky behavior. If parents are supportive and take the time to communicate with their children, they can influence teens to remain motivated and achieve their goals. Parents need to keep a watch on them and respect their independence.

I think the main difference is that we have choice in selecting what we watch or read about on the internet. Moreover, the internet is more interactive as it gives us the option to express ourself. For example, we can post reviews and rate movies after watching them.

4. Are libraries still beneficial? Why or why not?

Libraries are much more than places with a collection of books. They are places which provide a quiet environment for people to sit and concentrate on their work. Internet has positive as well as negative impact on children. If the internet access is not supervised or appropriate parental controls are not implemented, children can access restricted websites which can have a negative influence on them.

- When you received this news
- How you received this news
- Why you feel it was a good news

- In our day-to-day life, we hear a lot of news from others.
- Some are good and some are not so good
- Here I would like to talk about a news, which I heard from my neighbours.
- The news was that an international level sports stadium is going to open in my home town.
- About six months ago, as I was walking in a park near my home, I saw some neighbours standing in a group and discussing something.
- I joined them and came to know that they were talking about this stadium.
- As it is the sports facilities in my hometown are not so good and the young people do not have a place to develop their sporting talent.
- Many young people who are serious to do sports as a career have joined academies in Jalandhar and Phillaur.
- If there will be such facilities locally, then many more youngsters would be encouraged to do sports regularly.
- I feel it is a good news because we are leading sedentary lives.
- There is hardly any physical activity.
- Obesity has become a common problem among the people, especially young children.
- The youth is going towards drugs and other such vices.
- An NGO, run by some NRIs of my home town have donated two acres of land for this project.
- Our local MLA has got the approval for this and is being very proactive for fetching funds for this project.
- This stadium would have an underground car parking to accommodate 500 cars.
- The construction work has already started.
- The stadium would have a seating capacity of 5000.
- It would have covered seating areas also.
- There would be changing rooms for the sportsmen, and washrooms for the public.

- Many people who are serious, sometimes suffer from irreversible damage to their health because of this delay.
- For example, if a person suffers heart attack or stroke, then there are injections which prevent irreversible damage to the heart or brain.
- If there will be such facilities locally, then many people would get timely treatment and get well very soon and lead normal lives.
- I feel it is a good news because we all may need such treatment at any time during our lives.
- We are leading sedentary lives nowadays.
- There is hardly any physical activity.
- Obesity has become a common problem among the people, especially young children.
- Obesity is the root cause of many ailments.
- An NGO, run by some NRIs of my home town have donated two acres of land for this project.

- The hospital would be 200 bedded.
- It would have separate wings for all specialties.
- There would also be surveillance cameras all over, so that everything would be under scrutiny.

 - Whether we like it or not, we have to tolerate it. We can't escape it.
 - Here, I'm going to talk about a situation when there was too much noise.
 - A religious function, which we call jagrata or jagran, was held last Sunday in my neighborhood.
 - In such functions people sing hymns and chants in praise of Gods and Goddesses the whole night long.
 - The function started at 8 PM and went up to 5 AM.
 - There is a law against using loudspeakers after 10 PM but people don't abide by the law in the name of religion.
 - They do not realize that some people might be suffering from excessive noise.
 - I was not able to sleep the whole night.
 - I closed all windows of my house to reduce that sound, but it did not make any difference.
 - Then I put earplugs in my ears but that too did not work.
 - There might have been many other people who suffered like I did that night.
 - I am not against any religious event, but I'm definitely against using loud speakers after 10 PM.
 - Such laws should be implemented more strictly, and I believe that the use of pressure horns also must be restricted.
 - Noise pollution has a negative effect on our mental health as well as physical health.
 - It can lead to hearing impairment, Fatigue, Heart problems, Insomnia, Anxiety, Depression and so on.
 - It can also reduce the work efficiency.
 - One of my uncles has come from Canada and he tells me that in Canada people are not using horns unnecessarily and still the traffic runs very smoothly.

No I don't think it is good to allow children to make noise unless and until they face a threat from someone. Unnecessary noise creates a lot of disturbance and distracts everyone around.

16. What kind of noises are there in our life?

There are many different types of noises that we can experience in our daily lives, including: Environmental noises, such as traffic, construction, and nature sounds (e.g. birds singing, wind blowing).

Mechanical noises, such as those produced by appliances, machinery, and vehicles.

Human-generated noises, such as talking, laughing, and music.

Biological noises, such as those produced by animals, insects, and other living organisms.

Acoustic noise, such as noise from sound systems, and other audio sources.

17. Which area is exposed to noise more, the city or the countryside?

Cities tend to have higher levels of noise pollution than rural or suburban areas. This is because cities have a higher population density, more traffic on the roads, and more industrial and commercial activity, all of which can contribute to noise pollution.

18. How would people usually respond to noises in your country?

I think that the way people respond to noise in India can vary depending on factors such as age, culture, and socioeconomic status. But in general, people in my country may be more accustomed to living with a higher level of noise pollution than people in some other countries. This is because noise is a common part of daily life in India, where cities are often very crowded and busy, and there is a lot of traffic and other activity on the streets.

19. How can people consider other's feelings when chatting in public?

I believe there are many ways people can consider others' feelings when chatting in public. Firstly, people should speak at a moderate volume. They should speak in a normal tone of voice and avoiding talking loudly. This can help prevent conversation from disrupting the people around them.

Secondly, people should be aware of their surroundings. They should be mindful of where they are and who might be around them. For example, if they are in a library or a quiet area, it's best to keep the voice down. Finally, they should be sensitive to the topic of conversation and avoid discussing sensitive or controversial topics that might offend or upset others.

- What you taught him/her?
 - When it was?

-
- My sister lives in the US.
 - Last summer, she and her children visited us in India during the summer vacations.
 - Both her children, my niece and nephew are quite inquisitive and they are always keen on learning something new.
 - One day, they saw me playing chess online and they immediately developed an interest in chess.
 - They requested me to teach them.
 - They visit India very rarely, so I thought it would be a nice way to spend some quality time with them.
 - They were visiting for 2 months, so we had plenty of time.
 - I started with the basics and explained how each piece moved first.
 - With time, I covered some of the complex mechanics like castling and en passant.
 - I also bought them a membership at chess.com, so that they could practice alone when I was busy.

Part 3 Follow Up Questions

1. What are things that young people can teach old people to do?

I think they can teach them anything they are good at. However, if I had to pick something specific I would say the use of technology like how to use mobile phone features, apps and computer softwares.

2. What skills can young people teach the old besides technology?

I think they can teach them the ability to change and adapt. Old people are generally hesitant and unwilling to take risks and make changes but they are necessary to survive in today's world. They can also teach them how to take risks.

3. Why older people have problems in learning new things?

I think its about memory. I think people's memory deteriorates with time and people start forgetting things. For example, sometimes when I am teaching my mother, she forgets the previous steps. However, when I repeat it once or twice, she picks it up.

4. Do you think showing is a better way than telling during education?

Of course. Its easier to remember things we see. I am not sure why but I think our visual memory is far better. Moreover, there can be misunderstandings when telling something as words can be interpret differently.

5. Do you think constant training is important for people to study something?

Yes, practice is the key to success. I remember I once watched a video which said that if a person spends about 1200 hours on something, he can become an expert at it. I couldn't agree more. I remember I taught my mother how to use Microsoft Word and now she knows about it more than me because she uses it much more.

6.) How can the young teach the old?

I think the best way way would be show them to do something rather than telling them what to do. Young people need to be patient while teaching and remember that it takes the aged a little bit more time.

88. Describe your experience when you changed your school/college" or Describe an experience about moving to a new school or house/ Describe your first day at school

- Why did you change your school/college?
 - When was it?
 - Was that helpful?
 - What were the consequences after that?
- I have been to two schools in my life.
 - My primary school was different from my secondary school.
 - I have vague remembrances of my primary school as I was too small then.
 - Here I would like to talk about my secondary school in which I studied from 6th to 12th class.
 - I had to change my school because my father got transferred to a different city and we had to move with him
 - My school's name was SD Model Senior Secondary School.
 - I vividly remember I was very nervous on the first day.
 - This school was much bigger than my primary school.
 - I was afraid of getting lost there.
 - I was a little bit excited also.
 - I just walked inside with the other students and went where they were going.
 - I was a new face for them so many of them were staring at me.
 - I asked one student about where 6th class was.
 - Coincidentally she was also in 6th class.
 - She took me to her class.
 - That was the beginning of my new friendship.
 - Her name was Harleen and till today we are the best of friends.
 - She made me feel very comfortable.
 - All my nervousness vanished.
 - We attended the classes before the lunch break and during recess she showed me the whole school.
 - I was awed by the infrastructure of the school.
 - There were separate labs for physics, chemistry, and computer science.
 - There was also a huge library.
 - Badminton and volleyball courts were also there.
 - The canteen was the most impressive.
 - All the teachers were also very nice.
 - I studied for 7 years in that school.
 - Those were the most memorable years of my life.

Part 3 - Follow-up Questions

1. Are children better at solving problems than adults?

I don't think that children are better problem solvers as compared to adults because problem-solving requires two things, one is the logical ability and second is experience. Although children might be good at applying new approach or perspective towards the problem, however, they sometimes don't have the experience to solve the problems that they face. Sometimes who can solve it better will also depend on the nature of the problem.

2. If people move frequently, is it better to stay in one house all the time?

I don't think it would be wise to stay at one place if someone moves or gets transferred frequently to different cities or towns. For example, my brother, who is in the Army, gets posted to a new city after every 2 years, he always moves to the new place with his family because if he chooses to opt for a permanent home, then he would have to live away from his wife and children.

3. What are the pros and cons of living in a high-rise building?

I think the advantages that high-rise building offers is the beautiful views and easy access to facilities like gyms, swimming pools shops. On the other hand, the disadvantages include the fire risks and the fact that people have to live in compact spaces because the apartments and rooms in high-rise buildings are comparatively smaller in size.

4. What are the pros and cons of living in an old and new neighborhood?

I think the major difference of living in old and new neighbourhoods is the access to facilities. For example, in old neighbourhoods it is difficult to find parking spaces because during their construction cars were not that popular, whereas the new neighborhoods are much better planned and focus on the challenges that people face today.

5. How do parents prepare their kids to go to school on the first day?

I think firstly they should ensure that their children have a proper morning routine so that they get up on time. Secondly, they should stock up on all the school supplies like stationary and notebooks. Finally, I think they should talk to their children and tell them what should they expect, what should they do if they face any problems. Its important that the child doesn't see the school as a burden.

6. How do children socialise with each other?

I think children socialise with each other when they spend time with each other at school studying or when they do other extra curricular activities like painting. At younger ages it can be non-verbal and as they become older, they start communicating verbally.

7. Is socialisation important for children?

I think the importance of socialisation cannot be overstated. Socialisation makes them confident and teaches them to deal with new social situations. Also ,socialisation is the key to communication skills as well. Above all, socialisation is the key to making friends.

8. What are the benefits of changing schools?

In my opinion, children learn adaptation. Change is a part of life and its very necessary that children learn how to deal with new situations from a young age. Changing schools can be difficult for children

as they would need to make friends again so it necessary for parents to be present to help their children during this phase.

9. What are the reasons for job change?

There are many reasons for changing job. Firstly, it can be done to break the monotony of life or in other words to find something new to do. Another major reason is money. Some people also do it for the work environment as they find the work environment toxic.

 - He is managing his overhead expenses very nicely.
 - I intend to join him soon.
 - He has promised to help me find a job there.
 - I would like to work in the library.
 - Part time jobs in the library get filled up very fast.
 - If I don't get a job in the library, I would like to work in a restaurant or a fast food outlet.

 - Canada is a beautiful country.
 - My friend is in Toronto and he has told me that he has visited many places there.
 - He told me about the CN Tower and the Niagara Falls.
 - So, I would definitely like to live in Canada for a short time

Part 3 Follow Up Questions

1. What kinds of jobs are easy to get in a foreign country?

My cousin who lives in Canada tells me that there are many jobs that are easy to get for students studying there. The most common ones are the jobs in restaurants or fast food outlets like McDonald's, Burger King, Subway, and those in the college campus itself, like jobs in the library, etc.

2. Should young adults work abroad?

Yes, young adults should work abroad because of several reasons like, taking care of their overhead expenses, taking the financial burden off their parents' shoulders, they become more independent and responsible and they gain experience about the work culture, which would help them in their future. It is also a good way to learn about the culture of that country and to meet new people and make friends.

3. If they don't work abroad, would it be helpful for them to travel in a foreign country?

Yes, travelling is definitely helpful. They would come to know about the culture, meet new people, see new places, and make new connections. However, if they don't work, they may not be able to afford travelling.

4. Do Indian parents encourage their children to work abroad?

Yes, Indian parents encourage their children to work abroad. They prepare their children well before they travel abroad, about the situations and hardships they may have to face and the importance of working while studying there, so that they can cover their expenses and also gain work experience.

5. If you had an opportunity to live abroad, which country would you like to settle down in?

If I have an opportunity to live abroad, I would like to settle in a developed country, like Canada, Australia, the USA, etc. I have heard from my friends and relatives living abroad that life there is very comfortable, with better facilities and infrastructure. They also tell me that the standard living is very high there, as compared to India. Also, there are a lot of job opportunities available there.

6. Would you like to live in a developed city with a high salary but with polluted air?

If I am in dire need of money for my family, I would go for it, but otherwise I would avoid it. I would use a face mask to filter the polluted air. I would also avoid taking my family there with me.

7. Would you like to live alone or share a room with others?

This would also depend on my financial condition. If sharing a room would save me money, I would share, otherwise, living alone would give me more privacy and independence.

8. What are the advantages and disadvantages of living alone?

Disadvantages are that it would be costly and I would have to do all my household chores myself, but the advantages are that I would have more privacy and I can live according to my wish.

9. Do people prefer planned travel?

Yes, there are too many options to choose from nowadays. That's why it has become really important for people to plan their travel. Planning also reduces costs as last minute reservations or booking are really expensive.

10. Why are places with historical attractions more active in developing tourism?

I think historical places hold a unique charm for people. People often want to visit places they have read in history books, up close. Moreover, historical places are unique in the sense that we can find places with natural beauty anywhere for example hill stations, beaches but historical sites are particular to that location.

11. Why do you think people usually travel?

People travel to get a break from the monotony of life. They travel to meet new people, to experience a new culture. People also travel to spend some quality time with their loved ones as it is very difficult to find time during daily life nowadays.

12. Why do you experience more noise when living in a tourist city?

I think the major reason is increased traffic due to tourists. Moreover, there are entertainment centres like shopping malls, club, movie theatres and amusement park, which add to the level of noise.

13. Do you think tourists can experience bad things in other countries?

Certainly, firstly, there are many scams that target tourists especially for example exorbitant transportation charges. As tourists don't know much about the area, they are more likely to become a victim to such scams. Moreover, tourists may also experience racism sometimes.

90. Talk about an interesting old person you met recently

- Who is this person?
 - How you met him? How you know him
 - What you do with this person (optional)
 - Why you found him interesting?
-
- I know many old persons, but here I would like to talk about my friend Sonia's grandfather.
 - I met him about 6 months ago and I found him very interesting.
 - His name is Mr Jaswant Singh.
 - He is in his mid seventies.
 - He is not tall, but looks very handsome.
 - Even at this age he is very lithe and agile.
 - Sonia tells me that he is very health conscious, and never misses his morning and evening walk.
 - He retired as a colonel from the Indian army.
 - Once i visited Sonia's place to work on a project and there I met him for the first time.
 - He was sitting in the lobby doing something on his laptop.
 - I found it very interesting that a person of his age was so comfortable with a laptop.
 - He was placing an order at Amazon.in for some headphones.
 - My parents find it difficult to handle a smartphone and he was using a laptop like a pro.
 - He greeted me very warmly and so I started chatting with him.
 - I was amazed at his vast knowledge.

 - He told me stories of his life in the army.
 - He told me how he participated actively in the Kargil war.
 - So now whenever I go to Sonia's house, I make it a point to sit with him for some time and learn something new.

Part 3 Follow Up Questions

1. Do you think old people and young people can share the same interest?

It may sometimes be difficult for old people and young people to share the same interests. Young people are generally more energetic, so they prefer outdoor sports, but old people can only play those games which are not physically trying. It would be wrong to say that they cannot share the same interest. They both can share the same interest in TV programs, movies, indoor games, etc.

2. What skills can the old teach the young?

Old people today have seen a lot of changes in their lifetime. My grandfather has told me many stories of how difficult his life was when there were no vehicles and horses were used for transportation. He has also seen a lot of technological advancements. For example, the evolution of music started with radio and was followed by gramophones, cassette players, cd's and dvd's, and finally iPods and Mobile Phones. The most important life skills such as adaptability, versatility and openness to change, can be taught by the old to the young.

3. What skills can the young teach the old?

Young people are faster at learning about modern technology and better at operating gadgets. They can definitely teach these skills to old people. Also, since young people are now entering various businesses, other young people understand them and can do a better job of negotiating prices of goods and services. This too is an important skill for old people who are always keen to get a good bargain.

4. Do you think the old people should live with their family?

Ideally they should. But, if not possible for some reasons, they should be in old age homes and not live alone. Living alone can be dangerous for them.

5. Do you think the old and the young can have the same interests?

It may sometimes be difficult for old people and young people to share the same interests. Young people are generally more energetic, so they prefer outdoor sports, but old people can only play those games which are not physically trying. It would be wrong to say that they cannot share the same interest. They both can share the same interest in TV programs, movies, indoor games, etc.

6. Do you think people are more selfish or self-centred than in the past?

I don't think so. People are more ambitious and busier than in the past. As a result, people don't have much free time to help their friends or family members. I don't think that's being selfish, its just prioritising work.

91. Describe a piece of technology that you find difficult to use.

- When did you get it?
 - What did you get it for?
 - How often do you use it?
 - How do you feel about it?
-
- We live in a time where technology has made it possible to do many things considered unimaginable in the past.
 - But it has also come at the cost of simplicity.
 - Today, I would like to talk a washing machine, which offers so many features but is also very complicated to use.
 - Recently, our previous washing machine broke down and we decided to buy a new one.
 - I compared the different models online and ultimately decided on a Gen Z model from a famous company.
 - It boasted 102 different washing modes for different types of clothes.
 - None of the other models came even close to it.
 - When I bought, I never thought if I really needed 102 modes.
 - There are 102 different modes, but it is impossible for the machine to have 102 buttons.
 - The modes have to be changed and selected on the basis of just 10 buttons.
 - Its really hard to remember the buttons I need to press.
 - In fact for the simple basic wash cycle, I have to press five buttons in a particular order.
 - For this, I always need to keep the user manual closely.
 - Many times, if I click on a wrong button I have to start all over again.
 - It gives a headache to use it.
 - Earlier, our maid used to easily use the washing machine
 - However, this one is too complicated for her to use as she doesn't know English and the user manual is only in English.
 - I really regret buying this machine.
 - But I have also learnt a valuable lesson.
 - More is not always good.
 - I don't think I will ever end of using more than five modes in my life.
 - When buying things, I shouldn't care about what the technology offers but rather what I need.

Part 3 Follow Up Questions

1. What technology products or technologies are used by people now?

Our life is full of technology. In fact, we use a technology from waking up to sleeping. A few examples are all the kitchen gadgets, vacuum cleaners, washing machines, mobile phones, laptops, cars and so on.

2. Why do large companies often produce new products?

I think it is a game of constant one-upmanship. Companies are trying to cram in more and more features trying to out do each other without really thinking about what is essential. For example, there are mobile phones out there with more than 10 cameras.

3. Why are people so enthusiastic about buying newer iPhone models, even when nothing much changes?

I think the main reason is that the people want to show off that they own the latest model. Moreover, I think buying something new makes it exciting. We don't have the same bonds with products we earlier did and thus its very easy to throw away the older model for the newer one.

4. What changes has the development in technology brought in our life?

I think our life has changed tremendously. Some changes have had negative consequences, whereas others have made our life better. On the negative side, socials bonds have become weaker as we don't as much time with each other as earlier. In addition, our life has become sedentary as there is much less physical activity in our lives. On the positive side, we have much more options than the past. We have faster transportation, better healthcare and better food options. So, I would say its a mixed bag.

5. Has technology affected the way we study? How?

Yes, to a certain extent. For example, there are multiple modes of education like videos, audios, presentation and not just books. It has also changed the way we search for information. However, it hasn't completely replaced classroom learning which is still the main mode of education all over the world.

92. Describe a historical period you would like to know more about

- What period do you want to know about
 - Why do you want to know about it
 - How do you think you can know about it
-
- History has never been my favourite subject
 - But there are some periods of history, which have always fascinated me, and I would like to know more about them
 - One such period is the Indus Valley period
 - I recently saw the movie Mohenjo Daro, which tells about the way people, lived during those days.
 - First time I learnt about the period from my history book at school. My school also organized a trip to National Museum, New Delhi where there are many seals and pots from that period.
 - I also saw the plans of the Indus Valley Architecture.
 - Indus Valley people were very ahead of their times. They lived in cities with walls, in a time period which dates back to 2600-1900 BC.
 - Many buildings like baths, bead factories, granaries have been excavated at their ruins.
 - An interesting thing about the Indus valley people was they lived in burnt brick houses like today.
 - The streets met each other at right angles. There were drains, which could be cleaned.
 - Also there were no places of worship, people worshipped nature elements like air, water.
 - There are still many mysteries about this period that still need to be resolved.
 - Their script has not been deciphered as of yet.
 - There is a mystery regarding the decline of the civilization.
 - Some scholars say that there was a massive earthquake.
 - Others say that outsiders attacked them.
 - Still others say that they died because they had prolonged droughts and famine because of deforestation.
 - Sometimes I dream of going back to the past and uncovering all these hidden mysteries.
 - So this is the period of history I would like to know more about.

Part 3 Follow Up Questions

1. Do you think it is important to know about history? Should everyone learn about history?

Yes, it is very important to know about history. History tells us about our past and gives us a sense of our identity. It makes us feel like we are a part of something bigger. For example, we can't appreciate the freedom we enjoy today, unless we know that we were slaves in the past. History also teaches us not to repeat the mistakes of the past.

2. How can children learn about history?

Children can learn about history from books written by eminent historians, from museums, and from art galleries. Also, nowadays many websites have information about history. Finally, children can watch historical movies and documentaries to learn about the past.

3.) What is the difference between learning about history from books and from videos?

I think books contain a lot of factual details like dates and names which can make learning history boring in a sense. Moreover, learning through videos can increase recall as our visual memory is far long lasting. However, students also come out a lot of misinformation when learning from videos as there are a lot of inaccuracies in films.

4.) Do you think it is difficult to protect and preserve historic buildings.

Yes, it's very difficult in a sense as the maintenance costs for historic buildings is very high. To add to it, not enough people are visiting such buildings and they are not earning enough. Finally, many tourists are ignorant and vandalise the heritage sites by drawing graffiti on them. This leads to added security challenges.

5.) Who should be responsible for protecting historic buildings?

I think everyone should be responsible, the government authorities, the local people and the tourists as well. Firstly, protection requires funds, which can only be organised by government. The local people also have the responsibility to report any damaging activity to the government and finally, tourists have the responsibility to not litter or harm the buildings in any way.

6.) Who should pay for the preservation of historical buildings?

I think it should be partly funded by the government and partly by the entry fees charged to the visitors. It really depends upon the popularity of the historical building. If it's very famous, the ticket prices may be enough to pay for the preservation. However, if it's not as famous, then the government has to pay a considerable amount.

7. How do you think famous historical figures can serve as models for young people today?

Famous historical figures can definitely serve as role models for the young people of today. For example, when the young people of my country learn about the sacrifices done by our great martyrs, they are filled with a sense of patriotism, and want to do something for the country.

8. Do people in your country like to visit museums?

Yes, people in my country like to visit museums. They learn a lot from them. The modern interactive museums are more interesting for the young people and children. For example, people of my state

like to go to Pushpa Gujral Science City museum more than the other museums because they have a lot to do and see over there.

9. Who do you think likes to go to museums more – children or adults?

Both, children and adults like to go to museums, but children enjoy those museums, which are interactive.

10. Do you think museums should be free of cost to enter?

No, I do not think museums should be free of cost. These museums require a lot of maintenance. So a minimum fee should be there. Moreover, people do not value something, which is given to them absolutely free.

11. Do you think local people and tourists should pay the same amount to enter a museum?

Yes, local people and tourists should pay the same amount to enter museum. If tourists were charged more it would be unfair. Some people think that local people are already paying for the upkeep of the museums through taxes, so it would be okay if tourists were charged more. But I feel that tourists are helping in the economy in many other ways, so there is no need to charge them more for museums or other historical sites.

12. How do you think the museums of the future might be different from the museums of today?

What the future holds in store, no one can tell, but as far as I can see, the museums of the future would be more interactive. New things would be added to them from time to time. Activities would be there to entertain the children and others. Audiovisual aids would be used more.

13. How do you think the museums of the future might portray the 21st century?

Museums of the future might portray the 21st Century as an era of rapid progress in the field of technology, transport, education and health.

93. Describe an unusual meal that you had.

- When did you eat it
 - Where did you eat it?
 - With whom you had the meal?
 - Why do you think it was unusual?
-
- When I was a child, I used to be a very selective eater.
 - My mother was always worried about my health.
 - I used to drink milk but then I started avoiding it too.
 - I remember, I used to intentionally spill milk or throw it in the washbasin when no one was looking.
 - Once I mother caught me throwing it.
 - My parents scolded me a lot.
 - My dad told my mother that I should not be given milk again.
 - My mom was caught between a rock and a hard place.
 - I don't know how she came up with a fried milk recipe but the next day I was given some cutlets instead of milk.
 - I had no idea what they were but I loved them.
 - From then on, every morning, I ate those fried things.
 - I felt like the luckiest kid.
 - I also took a few for my friends in school.
 - They all loved them too.
 - Someone in school asked me, what they were made of.
 - I asked my mom but she said it's a secret.
 - For a few days I forgot about it but then one day, I actually saw my mom making them from the kitchen window.
 - They were made from milk. It was fried milk.
 - My mother had found a way of feeding me milk and at the same time making sure I didn't throw it.
 - She added many other things to it like eggs, lemon peels, and cornstarch.
 - I don't think I would have eaten them, if I knew they were made from milk before tasting them.
 - My mother made a whole meal out of something I hated.
 - It was of course less healthy as it was fried but she used very little oil too.
 - Even now, I sometimes crave them.
 - My mother is always ready to make them.

Part 3 Follow Up Questions

1. Do you think having dinner at home is a good idea?

Yes, of course. Home cooked meals are always healthier than meals at restaurants. At home we use the best oils and add spices to our taste. We also wash the vegetables properly before cooking.

2. Do young people like to spend time with their families or friends?

Young people like to spend time with friends more because they have no generation gap with friends. When they spend time with family, there are chances of misunderstandings. Parents have to be friendly, otherwise young people drift away from them.

3. What do you think are the benefits of having dinner together?

Certainly, firstly my interests have changed over time. I remember when I was really young, I saw a movie on space and I wanted to become a astronaut, but then it changed to becoming an doctor. 95. Talk about a thing you complained about something (but finally got a good result)

- What did you complain about
 - Who you complained to
 - When it happened
 - What was the result and why you were satisfied with the result?
-
- Well, I am a kind of person who usually does not like to complain a lot.
 - But when something is not done in the right way, I feel it's my duty to get it corrected, because complaining about it will make sure that it does not happen again.
 - Today, I would like to talk about a situation when I complained about a service and eventually got it corrected
 - It happened during last month when I had to get my account statement from the bank, which I needed for applying my visa
 - When I reached the bank in the morning, the officer told me that the bank's printer was broken.
 - He asked me to come back again the next day.
 - When I went to the bank the next day he again told me the same reason.
 - I requested them to get it fixed as it was an urgent requirement for me, but the bank officials did not seem to bother much about it.
 - So I decided to file a complaint with the higher authorities.
 - I came back home, opened the bank's website and sent an email to the bank management at their headquarters
 - I immediately got a call back from them and they said they will take strict action against this complaint.
 - I thanked them and went again to the bank.
 - To my surprise, as soon as I entered the bank, the manager came to me with my account statement.
 - They had got the printer fixed immediately after my complaint.
 - I came to know that a lot of other people were also suffering because of this issue.
 - The manager asked me to take my complaint back as senior management issued a notice to him for not listening to the customers, but I refused to do the same.
 - I told him it is his responsibility to look after the customers and listen to their problems.
 - He then apologised for it and promised me that in future he will take great care about it.
 - So this was a time when I complained about something and got a good result.

11. Do you think it is better to complain, by talking or in writing?

I think young people complain much more often as they have very high expectations and they are also not very patient. Old people have seen how things have improved over time and thus even if things are not perfect, they accept because they are generally better than the past.

Each one had to pay only 1000/- for the Levis jeans.

Yes, consumption is very important to a country for its economy to grow/progress. Consumption means customer demand and that leads to mass production, employment and makes any business profitable. However, over consumption can be negative as it leads to a consumerist and materialistic society. It also leads to environmental damage. So, people should draw a line on their consumption of consumer goods and it shouldn't lead to the above mentioned drawbacks or a throw away society.
5. What should parents do when their children ask for things their friends have?
Parents should make the children understand the difference between needs and desires. Parents should also be transparent about the affordability and family budget limitations so that children become more responsible and don't demand things from their parents only because of peer pressure.

11. Why do people like shopping more than in the past?

One reason is growing materialism. Owning new products gives us happiness. As a result, as soon as things become old and lose their novelty, we tend to renew that charm by buying something new. Secondly, people have more disposable income than in the past and thus they can buy a lot more than in the past.

12. Do you think shopping is a good for a country's economy?

 - It has reduced their travel time significantly and It has also become more convenient for them to travel from one place to another.

 - Moreover, it decreases the number of traffic jams in the city and the pollution caused when people use heir own private vehicles
 - This train has no driver; it is remotely controlled by a computer thus avoiding any human errors that can cause accidents.
 - When I first told my friends about this train, all of them were surprised/amazed/astonished to hear that a train can run without a driver as well.
 - This train has 8 coaches and capacity to carry 1000 people at one time
 - The coaches are very modern and have free wifi and phone charging facility as well.

English for Exams

1. Why do you think it is important to learn a foreign language?

It is important to learn a foreign language because it helps you connect with more people. As it is, today we do not belong to a big planet Earth; we belong to a small global village and to survive in this global village, it is necessary to be multilingual. For example, English is spoken in 86 countries. If you know English you can communicate with people of 86 countries.

2. How is it helpful to you to speak a foreign language?

I know English which is a foreign language. It is very helpful for me. Knowledge of English makes me feel more confident as it increases my communication skills and also it helps me in surfing the net because most websites are written in English.

3. What is the most difficult part of learning a foreign language for you?

I find some pronunciations very confusing at times. For example bough is pronounced 'bo' whereas tough is 'tuff'.

Sometimes the spellings which have silent words also confuse me. For instance 'b' is silent in doubt and debt.

4. What is the best way to memorize new words?

The best way is to start using them in daily life so that they become part of your natural spoken English.

5. Is it better to learn a new word from translation or by definition?

I think both ways are equally good. Sometimes some words are learnt best by translation and some by definition.

6. Why don't some people know the language of the society they live in?

This is perhaps because they live in their own shell and don't intermingle with those people.

7. What do you think of children learning a foreign language?

I think children should learn a foreign language. It is very easy for children to learn a foreign language as they are very receptive and they are not hesitant about making mistakes. They also have a benefit of not knowing any other language too well, to make comparisons and assumptions about the difficulty of language learning. In this era of globalization, knowledge of a foreign language is very beneficial for a better career and a brighter future. It opens more avenues for the students for higher education and good jobs.

8. Why are some language classes boring?

Some language classes are boring because of the teaching methods used. If there no interactive and fun activities involved in teaching a language and only textbook teaching methods are followed, students become bored easily. Incorporating technology in classrooms, keeps the students interested in learning and they learn it easily. For example, there should be audio-visual means used.

9. Some students hate to learn foreign languages, what can teachers do to develop their interest?

Some students hate to learn a foreign language mainly due to lack of interest and uninteresting teaching methods used. Teachers play an important in developing students' interest. Interactive and fun activities should be included to keep the children involved and interested in learning. If students are taught only from text books and there is a pressure of examination, it leads to students becoming bored or disliking language classes. Teachers should also use contexts and examples to which the www.youtube.com/makkarielts www.instagram.com/makkarielts www.makkarielts.com/books

students can relate in their day-to-day life. If they understand how the language can help and benefit them, students would be motivated to learn that language.

10. Some people travel for learning a foreign language, what do you think?

I think that traveling is a very good way to learn a foreign language. It is true that the more we use a language, the better we get at it. So, if travel to a county/region where that language is used, we will interact more with the local people in that language and learn its nuances better. Also, language is related to the culture. If we travel, we learn more about the culture and can learn the language better.

11. What's the best way to learn a foreign language?

I think the best way to learn a foreign language in a classroom environment, from a teacher who has in-depth knowledge of that language. The teacher should preferably be a native speaker of that language or should have a high proficiency level in that language. It is very important to incorporate technology and audio-visual methods to teach that language. Also, travelling to that country/region where the language is spoken is also a good way to learn it. These days learning a language through videos and online classes has become very popular, as the students get a chance to interact with the teachers and also with native speakers of that language, through the internet. There are many apps also available, which can be downloaded on smartphones, which help learning a foreign language in a fun and interactive way. For example, the Duolingo app.

12. Why can some people learn languages fast while others learn slowly?

Some people learn language faster than some others because of the teaching methods used to teach them. Interacting more with the native speakers also helps with learning a language better and faster. Also, there may be a motivating factor, like a job that requires them to learn that language, which makes people learn a language faster than others, who don't have any motivation behind learning a language.

13. Does one's age affect their language learning?

Yes, I think age affects language learning. I think the learning curve goes down with increasing age. Also, at an older age, people try and compare the new language they are learning with the language they already know. That may cause a hindrance in the learning of a language. People also become more hesitant about making mistakes and feel more embarrassed, at a later age, as compared to young learners.

Advantages for children to learn languages – Why it is good to learn languages at younger age

1. When children learn multiple languages at a younger age, they develop a lifelong love of communicating with others.
2. It is much easier to learn foreign language when young. At a later age it becomes harder to become fluent
3. Learning a foreign language helps a child's mind develop. Such children do better in other subjects. It helps their intellect to develop more
4. Learning a foreign language helps children to expand their knowledge of the world. They want to know about other people and other countries. They would want to understand them instead of being afraid of them.

Advantages for the adult learner of a foreign language

He has his own language to compare with the second language. So new terms or concepts are easily understood.

Yes, I do feel that people have less free time today than in the past. Today, people have become workaholics. They run after money and in doing so they work longer hours. So people had a lot of free time.

7. Today people use machinery to automate everything, is it good or bad?

It is both – good as well as bad. In many ways it is good. We have more time because of machines. We get good quality things because machines make uniform things. We do mass production because of automation and this boosts our economy as we can export things to other countries when we produce them in bulk.

On the other hand, many people have lost jobs because of automation. So, unemployment occurs and this leads to many other problems in society. Machines can also not give a personal touch to things.

8. How does modern technology help to save time?

I do not agree that machines should do everything. In that way we shall become slaves of our own creation. We should know when, where and how much we have to use machines. But where creativity is needed, we should do with our own hands.
